### Dual Pairing

**How to use?**

Turn off the bluetooth from the already paired device, the earphones will enter pairing mode, search for bluetooth devices on the new device and tap on Super Buds GT M9. The earbuds will get connected to the new device. Turn on the bluetooth on the first paired device then the earbuds will get connected to the first paired device. Now the earphones are connected to two devices for dual pairing.

When paired/connected with two devices simultaneously: During music/video playback, if there is an incoming voice call/phone call, the music/video will pause and resume after hanging up. If device A is a smartphone and device B is an iPad or laptop, priority will be given to the smartphone for answering voice calls/phone calls. For example, if device B is in a voice call and device A receives an incoming call and answers it, the conversation on device A will.

### Reset

When the headphones are disconnected to a Bluetooth device, press the left/right earphone five times in quick succession (after 5 presses, the blue light will turn off). After that put the earbuds back into the charging case.
