PRODUCT BRANDING

Our product branding process for leather goods involves five methods: Hot foiling in metallic colors, embossing, laser engraving, metal plate and embroidery.

Each branding method offers unique benefits, allowing customers to personalize leather goods with individual names or corporate logos, enhancing their appeal and exclusivity.

Branding option 1 - Hot Foiling in Metallic Color: Using heat and pressure, metallic foil is transferred onto the leather surface, creating a shiny, durable imprint. This method is ideal for logos and names, offering a luxurious finish.

Branding option 2 - Embossing into the Leather: By pressing a metal die into the leather, the design is raised or recessed, adding texture and depth. Embossing provides a subtle, elegant branding option suitable for various leather products.

Branding option 3 - Laser Engraving: A laser beam burns the leather surface, creating precise, permanent mark. Laser engraving allows for intricate designs and fine detailing, making it a versatile option for personalization.

Branding option 4 - Metal Plate: Metal plates with logos or names are affixed to the leather product using adhesive or stitching. Metal plates offer a sophisticated, durable branding solution, adding a touch of refinement to the leather goods.

FASHION ACCESSORIES

LADIES BELT - TYPE M

Code: LSC-LG-FA-02
Material : Bovine Leather
Color: Brown

LADIES BELT - TYPE P

Code: LSC-LG-FA-03
