CLEANING

Please take care when cleaning this monitor as the LCD screen can easily be scratched.

You will need a soft dry cloth

Do not spray cleaning chemicals directly onto the monitor

Do not apply water to the monitor as it is electrical and may damage the internal components

I INSTALLATION

STEP 1

Insert the batteries, making sure they are the correct way round.

STEP 3

Connect the male to female wires from the base to the monitor.

STEP 2

Remove the four screws from the back of the monitor.

STEP 4

Secure the monitor to the base using the four screws previously removed.

I OPERATION

The CT500 monitor has a total of 6 readouts, displaying:

Time Speed Distance Heart Rate Calories Odometer

When first powered on, the monitor will automatically be in 'Scan' mode. This means the digits in the largest segment on the screen will change every few seconds between time, distance, speed etc. This will allow you to have an overview while training without pressing any buttons. When the machine is in use you will also see a cycling icon in the top left corner, when you stop exercising the icon will disappear.

EXITING SCAN MODE

Press 'MODE' to exit scan mode and continuously press it to view each readout. If you are within scan mode, there will be a scan icon in the bottom left to indicate this.

SETTING TARGET PROGRAMS

On this monitor you are able to set a target **time, distance, pulse** and **calories**.

- Start by pressing 'MODE' until your chosen setting flashes.
- Then press 'SET' to change the digits to your desired target.
- Once set, begin your workout by pedalling and you will see the digits begin to change.

RESETTING YOUR MONITOR

Press and hold the 'RESET' button until all the digits come up and return to zero,

I DATA READOUTS

| Readout | Measurement |
|----------|------------------------|
| Time | Minutes : Seconds |
| Speed | KM/H |
| Distance | Kilometres |
| Pulse | BPM (Beats Per Minute) |
| Odometer | Kilometres |

I TROUBLESHOOT

| Issue | Resolutions |
|-------------------------|--|
| No power to the monitor | <ul style="list-style-type: none">• Make sure the batteries are fully inserted and the correct way round.• Check your connection wires from the monitor to the base. They must not be trapped, fully connected and the pins must be straight. |
| No pulse reading | <ul style="list-style-type: none">• Make sure the pulse plates are clean and dry.• Do not have any lotion on your hands.• Sweat can affect the reading.• Make sure both hands are fully gripping each plate. |
