

RECYCLED, ORGANIC

FERTILIZER

WHAT IS BLACK ANGEL?

Black Angel is made from food waste, where the nutrients become available through our biochemical fermentation process using effective microorganisms.

The fermentation process means that the liquid remains stable for up to 4 weeks.

VARIANTS

250ML, 5L, 10L

SETTING PHASE FUNCTION

- Indoor
- Outdoor
- Growth
- Flowering
- Nutrition

HOW TO USE IT

- Shake the bottle lightly before usage
- Given to your plants with each watering
- Mixed in a ration of 1:50
- Stored in a dark and cool place at <10 °C

APPLICATION

Black Angel is suitable for all plants, and is particularly good for fruit and berry bushes in the flowering phase.

CAUTIONS

- Stored away from children
- Do not drink. Promotes plant growth only
- Use according to the instructions
- In case of contact with eyes: rinse well with water
