PRODUCT OVERVIEW

BIO STIMULANTS

100%
ORGANIC

FRESH BIO STIMULANT

The fresh bio stimulant is a direct result of Bokashi. This liquid is highly potent and still contains active effective microorganisms (EM) that contribute to improving soil health.

MIXING RATIO	WATERING / WK
1:100	= 1 x
1:200	> 1 x

STORED IN A COOL
AND DARK PLACE

BLACK ANGEL

The filtration and pasteurization of the bio stimulant stabilizes the product and extends its shelf life. Furthermore, organic materials are added to give the product fertilizer values.

MIXING RATIO	WATERING / WK
1:50	= 1 - 2
1:100	> 1 x

STORED IN A COOL
AND DARK PLACE

100%
ORGANIC

PRODUCT OVERVIEW

FERTILIZERS

100%
ORGANIC

LIQUID FERTILIZER

At ReGaia, we follow a **zero waste** approach. That's why the extracted 'juice' from the liquid separation of our fermented material is used as a fully organic liquid fertilizer.

MIXING RATION	WATERING / WK
1:100	= 1 x
1:200	> 1 x

STORED IN A COOL
AND DARK PLACE

GRANULATED FERTILIZER

Fertilizer pellets are obtained by separating the liquid and solid mass from the fermented material. The product is mixed with other recycled components to achieve the desired NPK values.

DOSAGE (KG)	AREA (M ²)
3-5	100

STORED IN A COOL
AND DARK PLACE
