

Figural Edge Finish

1. Cut away weavers cloth, leaving $\frac{3}{8}$ " border along the edge. If edges curl, steam-iron flat. From outer edge of each corner almost to base of loops, snip cloth at $\frac{1}{4}$ " intervals. Do not cut the actual punched threads. In any indented areas, make snips every $\frac{1}{8}$ " and at an angle if needed.

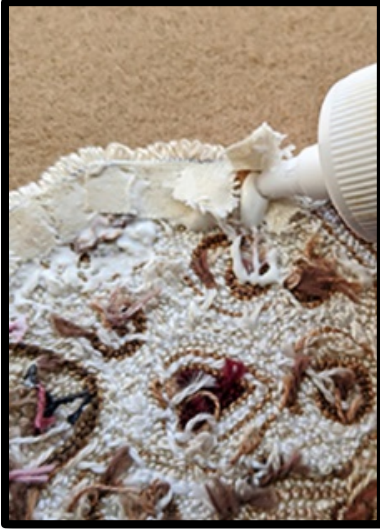

2. Iron overlapping pieces flat, towards design back. Trim and iron down any excess cloth that extends beyond the edge of design so it will not show in final display.

Figural Edge Finish

3. Adhere each snipped section to back of design with thinly spread layer of fabric glue. Cover design back with glue, flip, press into place on display board. Adorn with ribbon and a rusty bell. Display with pride!
