

Pointed Corners Finish

1. Cut away weavers cloth, leaving ½” border along edge. If edges curl, steam-iron flat.

2. Folded at a 45° angle in towards design back, steam-iron each corner flat, then long edges. Adhere each corner to back of design with thinly spread fabric glue, then glue down each long side, creating crisp neat corners (For even sharper corners, hand sew the seam of each corner together with needle and thread for a tighter point!).

3. Cover design back with thinly spread glue layer, flip, press into place on signboard. Glue ribbon to either side, and hot glue buttons to each ribbon. Display with pride!
