Wavy Edge Finish

1. Cut away weavers cloth, leaving ½" border along the edge. If edges curl, steam-iron flat. From outer edge of each corner almost to base of loops, snip into cloth at ¼" intervals. Do not cut punched threads.

2. Iron overlapping pieces flat, towards design back. Trim any piece that may extend past design edge. Adhere snipped edges to back of design with thinly spread layer of fabric glue.

3. Cover design back with glue, flip, press into place on display board. If desired, glue flat edge of pom-pom trim just under edge of the design so trim shows around edge or adorn with ribbon and buttons. Display with pride!
