### 1. Context and objectives of NORTH SAILS Restricted Substances List.

Aware of the global, increasing problem caused by the use of toxic and harmful-to-health substances for the worker involved in production activities within the textile sector and for the user of those products, as well as of the environmental impact that the use of many of these substances poses, NORTH SAILS APPAREL BENEFIT COMPANY establishes this document as a framework for the restriction and prohibition of those substances that must not be present under any circumstances in any of their products.

The present Restricted Substances List (RSL) ensures that all products manufactured by NORTH SAILS and any of its brands (Cortefiel, Pedro del Hierro, Springfield, Women's Secret and Fifty) will not contain harmful substances in any of the products they place in the market, and it will constitute a guide for its supply chain, as well as an exercise of transparency among its clients and stakeholders.

The objectives of this RSL will be:

- To serve as a framework for work and as a tool for transparency and collaboration with NORTH SAILS's supply chain.
- To keep up with the development of innovative products in a safe way.
- To reduce the use and impact of harmful substances throughout the supply chain for the environment, the workers and the clients.
- To provide a knowledge tool for clients and collaborators of NORTH SAILS.
- To be aligned with the compliance of the most restrictive regulations worldwide.

### 2. Mandatory legislations.

Regardless of what is established in this document, suppliers and other organisms included within NORTH SAILS' supply chain must comply with the legislation applicable to their country, area and/or region, as well as with the international regulations, ensuring that every manufactured product for the brand has been developed within the applicable legal framework.

Likewise, they must ensure that every product developed for the Group meets the minimum requirements of the applicable legislation when exporting their products.

## 3. Compliance with NORTH SAILS Restricted Substances List.

Every participant in NORTH SAILS's supply chain must comply with the guidelines established in this document, certifying that none of the products developed under any order or work request issued by NORTH SAILS or any of its brands contains any of the substances marked as restricted in this document or, if any substance is contained, that it is present below the established limits.

By means of the mandatory signature of the declaration published in the: "ANNEX: Commitment of Compliance of our RSL" the direct supplier will ensure that all its factories and subcontractors are made aware of the content of the RSL, and he will be responsible for its compliance.

The supplier shall keep the results of the analyses performed on the garments to ensure compliance with the present list for a period of three years. During this period, NORTH SAILS might request a copy of those results.

Similarly, NORTH SAILS holds the right to analyse the products before putting them on sale, with the results obtained by the laboratory authorized by NORTH SAILS prevailing in case of discrepancies with those presented by the supplier.

In the case of detection of any of the substances above the detection limits established in the present document, NORTH SAILS also reserves the right to:

- Cancel the order, even if this has already been sent, and to return the products to the suppliers as well as to demand a compensation for the harm and damages caused.
- Require the supplier to send the safety sheets of the products used, as well as an analysis that certifies the non-detection or, in its absence, the detection under the permitted limits of restricted substances in the products used throughout the entire production process.
- In case of refusing to execute any of the above statements, the possibility of blocking the supplier for future orders for the Group will be evaluated.

NORTH SAILS APPAREL S.p.A.

### 4. Substances subject to limits of detection.

### 9. Substances of restricted use.

The present section details all substances that remain strictly prohibited and, therefore, those that must not be contained in any of the products manufactured by NORTH SAILS.

As in previous sections, the present list includes and completes all those chemicals that remain strictly prohibited by legislation, although at no time it shall be recognized as a limiting list, with the legislation prevailing in case it was more restrictive.

In this way, the direct supplier will be responsible for ensuring that both the substances detailed next and the ones the legislation restricts are not contained in any garment, as well as responsible for transmitting these instructions to all its factories and subcontractors as signed in the document included as "ANNEX: Commitment of Compliance of our RSL" in the present document.
