Description of LCD display

Understanding the button actions:

Mode: Setup the working mode and schedule.

Set: Set the mode, set the time, move the cursor or press and hold for 5 seconds in the standby interface to restore the factory settings.

Up: Increase in time and concentration, select or deselect the day of the week.

Down: Decrease in time and concentration, move to the left when selecting the workday or press and hold down to delete the mode.

Operations:

Setting Current Day of Week & Time on Diffuser:

-On the lcd screen, press **Set** to enter the time and day of the week on the device. It will ask for the time first and then the day of the week.

- Enter hour using up or down buttons, then press set. **(military time)**
- Enter minutes using up or down buttons, then press set
- Enter day of the week using up or down buttons to move between the days. Then press set.

Setting up Schedule and Intensity Levels on the diffuser LCD display (manual mode): (Please note you may skip this and do it on the APP instead on bluetooth mode next)

-Select **Mode** to set the working schedule desired and intensity levels. After selecting mode it will show event 1. (Each event is a separate schedule, you can set up to 4 different schedules) Lets set event (schedule 1):

- After selecting Mode from above, then press **Set** to select the days of the week you want to include in the schedule. Sat will start blinking as it is the first day. Press Down until you reach Mon. On Monday use the UP button to deselect/select it. Once satisfied press set to move to the next day. Repeat the process for the 7 days of the week, selecting only the ones you wish to include in this schedule.
- Now it will ask for “**event on**” time. Use UP or Down to change hour and minutes selecting SET when satisfied. (military time)
- Now it will ask for “**event off**” time. Use UP and Down to change hour and minutes selecting SET when satisfied. (military time)
- It will now ask for “**Scent on**” in seconds. Use up or Down to set a number. The default is 60 seconds. Once you have the number you want, press set, This means the diffuser will put out fragrance for 60 seconds and then rest.
- It will now ask for “**Scent Pause**” or rest in seconds. Use up or Down to set a number. The default is 60 seconds. Once you have the number you want then press set. This means the diffuser will put out fragrance for 60 seconds as you selected on the “scent on” and then rest or pause for 60 seconds in between. Your diffuser will now work 60secs and pause 60 secs and so on for the duration of the schedule.
- Now just press Mode repeatedly to go through all the 4 events until it starts to put out fragrance.

- **Bluetooth Mode (recommended):**

The machines come automatically setup for bluetooth mode. Just go to the APP instructions to set it up. Once you select + Add bluetooth device on the APP the diffuser will show automatically on the list.

Here you can setup the schedule and intensity levels on the APP instead of manually on the device.

MAINTENANCE

In order to ensure the best diffusing effect, please check and maintain the device every six month, or when you replace a new fragrance, or when the diffusing effect gets weak. Follow these steps:

1. Turn off diffuser.
2. Take off the oil bottle.
3. Clean it with warm water and soap and make sure it is completely dry before you put in a new fragrance to avoid the fragrances mixing. The diffuser is waterless; make sure it is completely dry. (Do this step any time you are switching to a completely new fragrance)
4. After cleaning the empty oil bottle, fill the bottle with a little alcohol and install it on the device, then run the device for about 5-8 minutes to clean the internal mechanism.
5. After the device is clean, turn it off. Unscrew the bottle. Make sure to dispose of any alcohol remaining inside the oil bottle and dry it before putting in the new fragrance oil.
6. Put the bottle back into the diffuser.
7. Turn it back on.
