# EZ Finish Outdoor Systems

EZ Finish Outdoor Systems are designed as ready-to-finish structures. Outdoor kitchens, fireplaces and fire pits are now even easier to install. They are simply veneer and can be operational in less time and with less labor than competitive products. Our revolutionary bolt-together system allows you to offer customers custom designs and assemble on site in just hours—not days or weeks.

In-stock cabinets allow quick turn around, from order to job site.

We also offer a full line of custom-made seating walls, pillars and water features. These are all custom built to your specifications to meet your customers exact layout design.

- ✓ Ready-to-Assemble Structures
- ✓ Custom-Built Structures
- ✓ Design Services
- ✓ Consulting
- ✓ Technical Support

# About Our Structures

All of our structures are welded 6061-T6 aircraft grade aluminum bar stock. This keeps your structures light weight without losing any structural strength, allowing you to install your structures on multiple surfaces including decks, patios and pavers blocks to name just a few.

Noncombustible material is used for all of our structures, eliminating the need for insulated jackets or liners. 6061 aluminum will not rust and needs no special coating to maintain corrosion resistance. All of our structures are finished with 1/4" Hardie backer board. Additional material available upon request.

## Benefits of Aluminum vs. Steel, Galvanized and Wood Structures:

	Aluminum	Steel	Galvanized Studs	Wood
Light Weight	yes	no	yes	no
Rust	no	yes	yes	no
Rotting	no	no	no	yes
Combustible	no	no	no	yes
Welded Frame	yes	yes	no	no
Yield Strength	40k	36k	n/a	n/a
Flex and Deflection	minimal	moderate	high	high

# Assembly Instructions

- 1) Set up cabinets in desired location
- 2) Align bolt holes and loosely secure washers and nuts in all locations (hardware included)
- 3) Tighten bolts starting at top while aligning cabinets. Tighten bolts from top to bottom on all cabinets.
- 4) Level entire structure after assembly and before veneer installation. (we recommend a slight pitch for water run off)
- 5) Test fit all components prior to veneer and counter top installation
- 6) Fiber tape all seams and corners. (2 layers) one on structure and one embedded in scratch coat.
- 7) Please consult with veneer manufacture for any specific installation instructions.
- 8) Verify counter top thickness prior to veneer installation
- 9) Technical support available for any questions or concerns
- 10) Level Legs and level bolts are for leveling unit prior finish ONLY! Unit must be shimmed accordingly before finish veneer installation.
- 11) Verify all components fit unit before veneer installation. We must be notified before veneer installation if any discrepancy's exists.

---

## CABINET SHEATHING OPTIONS

All of our stock ready to assemble cabinets come standard with 1/4" Hardie Backer board glued and fastened to cabinet frame. Additional options are available.

- Frame Only—No sheathing
- Frame with 1/4" Hardie Backer Board
- Frame with 1/4" Cement Board
- Frame with 1/2 Cement Board

Please Consult with your Veneer manufacturer when deciding what type of sheathing is best for you project.

# READY-TO-ASSEMBLE STRUCTURES

Our Ready-to-Assemble Cabinets are premade and ready to be installed.

Similar to our standard designs, this system allows you to change the design and placement of all your components. With smaller sections, you simply need to arrange your outdoor kitchen any way you desire, and then bolt the sections together.

All cabinets come with pre-drilled bolt holes and hardware to make your custom outdoor living space your own.

All of our structures come premade to fit popular outdoor living components, simplifying your outdoor design process, while giving you the option to change your design on site to meet your specific needs.
