**BETTER TASTING  
& LOOKING FOOD**

Similar to the way heat transfers electricity rapidly through a wire, aluminum GrillGrates are exponentially more heat conductive than traditional grill surfaces. And they never rust!

## **NO MORE CHARRED FOOD**

---

## HOW IT WORKS:

Traditional grill surfaces hold food over the heat letting flames through and drippings fall away. GrillGrates concentrate and even out the heat of any grill.

**GRILL OR GRIDDLE**

**PERFECT SEAR MARKS**

**JUICIER FOOD**

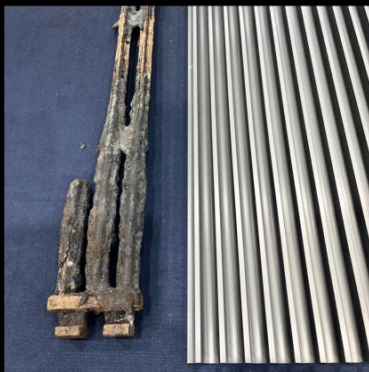

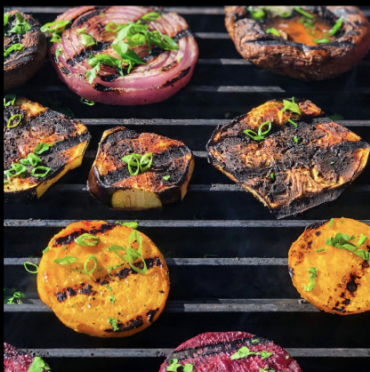

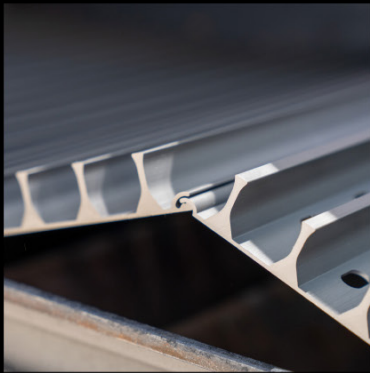

**FAST, EVEN, HEAT**
