Demineralizer for all Gravity-feed Irons

SF-100

PRECAUTIONS

1. Do not eat 2. Do not let it come into contact with your eyes 3. Do not use it for purposes other than removing lime from a steaming iron 4. Do not disassemble

This water-purifying filter for iron is designed to be used for a steaming iron only. Never use it as a purifier for drinking water. The lifespan of the product may be affected by the quality of water (300ppm or higher) and the frequency of use so it is recommended to replace it with a new one on a regular basis (every three months) to maximize the intended effect.
