

# UNITY SOLARCURE INSTRUCTIONS

Ideal for at-home use.

For gel nails with no LED/UV lamps needed, all you need is UNITY All-In-One and the sun!

## 1. PREP NAILS

Lightly buff nails and cleanse with 70%+ alcohol to remove oils and dusts.

Wait for nails to dry completely.

No primers, bonders or heavy sanding required.

## 2. UNITY FIRST COAT

**Apply while indoors and away from direct sunlight.**

Shake well before use.

Apply one thin coat and do not cap the free edge.

Place hands and toes in direct sunlight to SolarCure for 2+ minutes.

Cure times will vary and depend on the strength of the natural sunlight.

Once fully cured, you will be able to touch and feel no tacky inhibition layer.

No cleansers required.

## 3. UNITY SECOND COAT

Repeat Step 2 until desired opacity is reached.

## 4. NO-WIPE TOP GEL POLISH (OPTIONAL)

**Apply while indoors and away from direct sunlight.**

For a longer-lasting shine, finish with one thin coat of No-Wipe Top Gel Polish and SolarCure. Once fully cured, you will be able to touch and feel no tacky inhibition layer. No cleansers required.

## PRO TIPS

- For best results, SolarCure is recommended during daytime with clear skies and full sunshine.
- Always paint indoors and away from direct sunlight.
- No sun? No problem. UNITY can cure in any LED/UV lamp.
