

REFILL APPLICATION

1. Prep nails by pushing back cuticles
2. Remove old Dip Powder by carefully filing down until there is no more colour using a 100/180 grit nail file
3. Buff off any excess product residue with a 180/240 grit buffer
4. Wash hands and properly sanitize prior to next steps
5. Apply **BSG Dip Liquid #1 Prep** to all ten fingers and allow 60 second air-dry
6. Apply **BSG Dip Liquid #2 Base** and immediately dip into **BSG Dip Powder #0 Natural**. Dip in a 45-degree angle and tap off excess powder. Complete one nail at a time in order to prevent the **BSG Dip Liquid #2 Base** from drying too quickly.
7. Apply **BSG Dip Liquid #2 Base** only 75% of the nail (leaving excess room at the cuticle) and immediately dip into desired **BSG Dip Powder Colour**.
8. Repeat this step until desired colour and coverage is achieved, with second coat of **BSG Dip Liquid #2 Base** covering 100% of the nail
9. Apply final **BSG Dip Liquid #2 Base** and immediately dip into **BSG Dip Powder #00 Clear**
10. Apply **BSG Dip Liquid #3 Activator** and allow 60 second air-dry
11. File, buff and shape nails as desired
12. Apply **BSG Dip Liquid #3 Activator** and allow 60 second air-dry
13. Use a lint-free wipe or sanitized cosmetic brush to wipe off any remaining loose powders
14. Finish with 1-3 coats of **BSG Dip Liquid #4 Top**, allowing 2 minutes air-dry time in between coats
