

## Bellhop Wall

Wall Sconce Designed by Edward Barber & Jay Osgerby

### Description

Originally conceived as a table lamp for the London Design Museum restaurant, Bellhop moves outdoors. Reminiscent of a hatted hotel porter, Edward Barber & Jay Osgerby's contemporary design offers diffused lighting which enriches landscapes and architecture.

Bellhop utilizes the latest generation LED technology installed around the lamp head, protected by an opal optic diffuser, allowing a smooth and homogeneous light to radiate all around the pole.

### Lamp

Lamp Type	LED
Wattage	8W
Output Nominal	783lm, 816lm, 873lm
Color Temperature	2700K, 3000K, 4000K
Color rendering	CR180

### Dimensions

### Optical

Beam Angle	85°
Lighting Type	Direct
Light Distribution	Symmetric

### Physical

Material	Aluminum
Aiming	Fixed
Weight	1.76 Lb
Ingress Protection Rating	IP65
Finishes	Painted lacquer

- 01 White    06 Grey    12 Forest Green
- 30 Black    18 Deep Brown    33 Anthracite    05 Stainless Steel

### Certifications

Suitable for Wet locations

### Photometrics

For current IES files please visit [architectural.flosusa.com](http://architectural.flosusa.com)

### Warranty

2 years from date of sale.

Installation type	Wall Surface
Environment	Outdoor / Wet Location

## Bellhop Wall

Wall Sconce Designed by Edward Barber & Jay Osgerby

### Electrical & Control

Voltage	120V
Control	Non Dimmable
Driver	Integral

### Performance

Maximum delivered output	607
Efficacy	75.9 lm/W

### Notes

Recommended connections for in-ground installations with a 2-way terminal block 4-pole IP68 water stop on 24V side. Order separately.

Painted versions are an exterior rated epoxy polyester powder coat finish for superior strength, heat and UV resistance.

During installation and maintenance avoid scratching or damaging the finish as it may result in premature corrosion of metal surfaces. Avoid cleaning fixtures with corrosive chemicals as it may result in voiding the warranty.

LED fixtures are highly susceptible to failure due to electrical effects from poor connections, and electrical short circuits. These are frequently caused by (a) over-voltage from primary voltage sources, (b) electrostatic discharge from the exterior environment. Ensure that all outdoor fixtures are installed on GFI circuits as required by code, and use proper surge protecting devices to avoid irreversible damages to electrical components.

Bellhop Wall includes a Jbox Cover Plate
