

REAL COLOR ACCURACY

To get the best, most accurate colors, we called for the advice of four great experts like Jürgen Kiroff, Przemyslaw Skulski, Mike Starmer and Steven Zaloga.

Their knowledge on the matter is second to none, as they have studied and researched for years through official, private and industry archives. The combined research of these authors and historians, the study of preserved and museum artifacts, and the laboratory work on their colors, make together the most detailed and meticulous study carried out by a paint brand to get accurate, Real Colors.

REAL ACRYLIC LACQUER

The new Real Colors paint range is a very, very special step forward for AK. And we guess for you, too.

AK Real Colors is a state-of-the-art acrylic lacquer paint developed in our own laboratories and a big step in the evolution of our company. That has been a project we have been quietly thinking, working and developing for a long, long time. An improved chemical formula over other brands in the market and a paint of the highest quality were our objectives. And finally, after all that lengthy, quiet development and testing, we have them ready for you to enjoy: Real Colors.

FORGET
THE CLOGGING:
AK REAL COLORS
FLOWS
SMOOOOOTHLY
IN YOUR AIRBRUSH.

If lost in a forgotten island, you can easily mix Real Colors with the stock of paints from other brands you may have ;)
