

meso.prof
**maximum purity,
quality and concentration
of active ingredients**

meso.prof

The most comprehensive range of solutions and specific active ingredients in autoclaved vials and ampoules to be integrated with transepidermal penetration devices and systems to address aesthetic problems of the face, body and capillaries.

The **meso.prof** range has two lines:

ACTIVES PROFESSIONAL SOLUTIONS

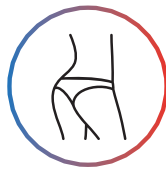

c.prof

Active ingredient cocktails to address specific indications.

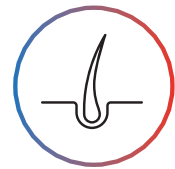

facial

- Provides hydration
- Provides radiance
- Firming
- Anti-wrinkles
- Skin redensifying
- Depigmentant

body

- Draining
- Lipolytic
- Firming
- Anti-cellulite
- Anti-stretch marks
- Improves microcirculation

hair

- Anti-hair loss

ACTIVES PROFESSIONAL SOLUTIONS

x.prof

Single substances to design 100% customised treatments.

Key characteristics of meso.prof

efficacy

High concentrations of highly effective active ingredients.

safety

Autoclaved vials and ampoules that retain their properties over time.

quality

High pharmaceutical quality standards.

versatility

Synergy with transcutaneous delivery devices and systems.

Protocol treatment at the clinic

phase 1: skin preparation

PRE-TREATMENT

Clean the skin with **hydramilk** and tone with **hydratonic**. Degrease with **pre-procedure cleansing solution** and disinfect with chlorhexidine or alcohol. Protect sensitive areas with **mesolips protector**.

phase 2: skin renewal

TREATMENT

Perform the peel following the protocol determined at the professional's discretion.
Optional phase dependent on skin tolerance.

phase 3: contribution of actives ingredients

Apply products from the **meso.prof** range suitable for the indication to be treated with the selected delivery system.

phase 4: skin recovery

POST-TREATMENT

Apply **crystal fiber mask** and leave on for 20 minutes.

phase 5: end

Apply **mesoprotech**® range photoprotection suitable for each skin type.

actives professional solutions

c.prof • Active ingredient cocktails to address specific indications.

Biomimetic peptides

Sequences of amino acids structurally identical to those of peptides present on the skin and that, therefore, imitate their natural functions in the human body.

c.prof 213 mesotox solution

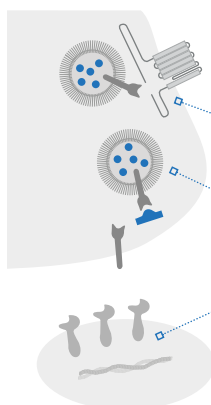

Reducing and preventive action in the appearance of expression lines. Two synergistic peptides that work on the inhibition of dermal microcontractions.

indications:

- Dynamic wrinkles
- "Botox-like" effect

active ingredients:

- Acetyl hexapeptide-8
- Pentapeptide-18
- Niacinamide

"Botox-like" peptides

1. Closure of the Ca^{2+} channels **Pentapeptide-18**
2. Destabilisation of the SNARE complex **Acetyl Hexapeptide-8**
3. Blocking of neurotransmission and inhibition of muscle contraction

Fig.1. Neuromuscular junction (control) and biochemical mechanism scheme of Acetyl Hexapeptide-8 and Pentapeptide-18 peptides during neuronal exocytosis (c.prof 213 mesotox solution) (1)

c.prof 214 mesopeptide solution

Redensifying and tightening action. Biomimetic peptides favour skin redensification thanks to the collagen induction activity and its improvement in the organisation of fibrils.

indications:

- Thin and aged skin
- Loss of the facial oval definition and sagging

active ingredients:

- Palmitoyl Tripeptide-5
- Acetyl Tetrapeptide-9
- Hyaluronic Acid

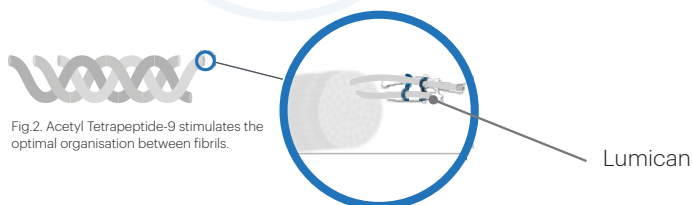

Fig.2. Acetyl Tetrapeptide-9 stimulates the optimal organisation between fibrils.

c.prof 210

depigmentation solution

Depigmenting and antioxidant action that corrects melanin overproduction.

indications:

- Moderate hyperpigmentation: solar or senile lentigo
- PIH (post-inflammatory hyperpigmentation) in all phototypes
- Dyschromia and dull skin

active ingredients:

- Tranexamic acid
- N-acetyl glucosamine
- Vitamin C
- Idebenone

c.prof 211

photoaging solution

It counteracts the skin's own manifestations of photoaging thanks to its **antioxidant, moisturising and firming action.**

indications:

- Treatment of fine wrinkles
- It counteracts the loss of tonicity and provides radiance
- Dyschromia and unification of tone

active ingredients:

- Idebenone
- Vitamin C
- Hyaluronic acid
- Taurine

c.prof 230

hair loss solution

Revitalising and activating action in hair growth.

Slows hair ageing, revitalising and strengthening the hair.

indications:

- Reacting, seasonal loss or caused by nutritional deficit in both sexes
- It improves microcirculation and the contribution of nutrients to the follicle, revitalising and strengthening it

active ingredients:

- Copper Tripeptide-1
- Vit-B complex (biotin, dexpanthenol and pyridoxine)
- Zinc
- Capsaicin and caffeine

c.prof 231

dutexome solution

Controls hair loss by normalizing hair cycles, inhibits the formation of DHT, increases hair density and reduces the miniaturisation of hair follicles.

indications:

- Loss due to hormonal factors in both sexes
- Regulates the hair cycle by increasing hair thickness and density
- Improves hair follicle's anchorage
- Activates microcirculation and the provision of nutrients to the follicle

active ingredients:

- 0.05% dutasteride
- Aloe vera exosomes
- Copper-1 Tripeptide
- Vit-B complex (biotin, dexpanthenol and pyridoxine)

actives professional solutions

c.prof • draining target

c.prof 220 draining solution

Draining, decongestant, venotonic, antioxidant and firming action.

indications:

- Circulatory disorders
- Fluid retention

active ingredients:

- Sweet clover
- Rutin
- *Ginkgo biloba*
- Aescin

c.prof • lipolysis and cellulite target

c.prof 221 lipolytic solution

Fat mobilising action. Increases lipolysis in adipocytes, reducing the size of fat deposits.

indications:

- It contributes to reducing body fat and adiposity located in the double chin
- It improves the appearance of the silhouette, cellulite and orange peel skin

active ingredients:

- Artichoke extract
- Organic Silicon
- Theobromine
- Caffeine
- L-Carnitine

c.prof • firming objective

c.prof 222 body firming solution

Body firming action: skin trophic, firming and tightening effect.

indications:

- Skin flaccidity of the thighs, arms, abdomen, sides and buttocks

active ingredients:

- Hydroxyproline
- Organic Silicon
- DMAE
- Sodium Pyruvate

c.prof • specific indication: cellulite

c.prof 224 cellulishock solution

Action with a cellulite reducing and smoothing effect. Venotonic and decongestant effect. Activates the metabolism and degradation of fatty acids, reducing the volume of adipocytes.

⊕ indications:

- Cellulite in all its forms and degrees of evolution
- Reduction of fat nodules

⊕ active ingredients:

- Caffeine
- Rutin
- Capsaicin
- L-Carnitine

c.prof • specific indication: stretch marks and scars

c.prof 223 skinmark solution

Restructures skin imperfections such as stretch marks, scars. Moisturising and firming action.

⊕ indications:

- It improves the appearance of stretch marks
- Post-acne and body scars
- Skin repair

⊕ active ingredients:

- X-DNA (polynucleotides)
- Organic silicon
- Extract of *Chlorella vulgaris*
- Darutoside

⊕ bodycare professional solutions

body solutions • bodyshock® and grascontrol®

Range of customized body solutions with professional products, home products and nutritional supplements.

They treat on a customized basis the main body concerns.

actives professional solutions

Combination with multiple technologies

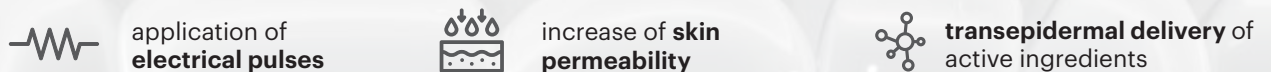

Microneedling is a minimally invasive technique that generates transepidermal microchannels producing dermoepidermal biostimulation, and increasing the activity of the active ingredients

mechanism of action:

Electrophoroporation is a delivery system that combines the benefits of iontophoresis and electroporation, allowing the release and delivery of active ingredients in the innermost skin layers.

mechanism of action:

🏠 Complementary home products

antiaging • age element®

Solutions based on the epigenetics science that manage to reverse the effects of skin aging catalysts to counteract the signs of skin aging.

☀️ ANTIAGING BRIGHTENING SOLUTIONS

Antioxidant protocol for a more radiant skin.

⬆️ ANTIAGING FIRMING SOLUTIONS

Restructuring protocol for a firmer and smoother skin.

🌊 ANTIAGING ANTI-WRINKLES SOLUTIONS

Regenerative protocol for smoother and retexturised skin.

depigmentation • pigment control solutions

melan tran3x concentrate melan tran3x gel cream

Depigmentation programme whose formulas act on hyperpigmentation on a daily and progressive basis, attenuating dark spots. With tranexamic acid.

hair care • hair care solutions

tricolony lotion tricolony caps tricolony shampoo

Intensive anti-hair loss programme with revitalising action on the scalp.

actives professional solutions

Solutions and specific active ingredients in autoclaved ampoules and vials for incorporation into transepidermal penetration devices and systems.

2 product lines: **c.prof:** combinations of active ingredients to treat specific cosmetic concerns. **x.prof:** active ingredients to design 100% customised treatments.

Highly **versatile, safe** products, that ensure a high therapeutic response with a high efficacy level.

Synergy with devices and **transepidermal penetration systems** (microneedling, electroporation, iontophoresis, ultrasound, cavitation, IR therapy, etc.).
