GRIP[®]
WALK

Dear customer,

You have recently purchased a Gripwalk[®] outsole set in accordance with ISO standard 23223. In your own interests and for your own safety, please read carefully and follow the instructions and warnings enclosed with this product.

It is recommended that you have the Gripwalk[®] outsoles fitted by a specialist retailer.

The Gripwalk word mark and logo are registered trademarks of Marker Dalbello Völkl (International) GmbH. All rights reserved.

Better walking grip

High-profiled slip-resistant sole

Walking comfort

Increased walking comfort and improved natural roll thanks to curved rubber sole

No height adjustment for gripwalk bindings

Simply step in: GripWalk bindings need NO height adjustment even when used with regular alpine boots and soles

GENERAL WARNING NOTES

· As a skier, you should be aware of the risks associated with this sport and take these into consideration.

The ski-binding-boot combination is no guarantee of release in all conceivable situations with the risk of injury or danger to life.

· You have purchased an outsole set in accordance with ISO standard 23223, which provides increased comfort and better grip when walking, but is not intended for climbing or mountaineering. This outsole set bears the product identification 'Gripwalk®' and is compatible with the following binding systems:

- Touring ski bindings in accordance with ISO standard 13992
- Alpine ski bindings in accordance with ISO standard 9462 with the additional marking 'Gripwalk®'. 
- Alpine and touring bindings with an adjustable AFD height (marked "MN" for MutiNorm)

GENERAL WARNING NOTES

- Skiers may thus exclusively use these outsoles with the binding systems listed above.

The use of these outsoles with other binding systems can lead to the failure of the ski-boot-binding combination and impair the release function.

- We recommend skiers contact a specialist retailer to obtain detailed information about the binding systems that are compatible with these outsoles.
- Kästle recommends as a matter of urgency, particularly before the skiing season and after any change of the outsoles, that you contact a specialist retailer to check the correct fit of the ski-bootbinding combination with suitable measuring equipment and, if required, have the system readjusted.

FITTING NOTES

The 'Gripwalk®' outsoles are removable and must be replaced when worn and/or damaged. Kästle guarantees that the outsoles can be affixed and removed up to 5 times, provided that the following instructions are noted:

- Only use a hand screwdriver to loosen and remove the 9 screws from the outsole and to screw the new outsoles in place.
- Remove the outsoles from the boot at the front and back.
- Position the new outsoles as precisely and closely as possible.
- Screw the new outsoles in place by hand with a tightening torque of 1,5 Nm.

To label the fitted outsoles, we recommend affixing the enclosed Gripwalk® sticker to the boot in a clearly visible location.
