

Approved cars for iZi Up FIX provided that the car is equipped with ISOfix

The iZi Up FIX is a semi-universal ISOfix child restraint system. It is approved to regulation 44.04 series of amendments for general use in vehicles fitted with ISOfix anchorage systems.

The iZi Up FIX is suitable for fixing into the seat positions of the cars listed below, providing approved ISOfix points are fitted and available. Due to differences in cushion shape and angle, the iZi Up FIX has to be tested in the particular vehicle seat if it really fits in the right way. Seat positions in other cars may also be suitable to accept this child restraint, however we have not yet tested that combination of car and iZi Up FIX. If in doubt, consult either BeSafe or the retailer. For updated carlist see: www.besafe.eu The child must always be secured with the 3-point carbelt, using the iZi Up FIX. In cases where the fixation point of the 3 point carbelt is positioned in between the ISOfix points of the car, the iZi Up FIX can not be used with connected FIX arms.

In some vehicles the space for the head in the rear seat is limited. If you fasten the iZi Up FIX with the FIX arms in these vehicles, it may not be possible to use the child seat up to a standing height of 1.50 m. This may be the case, for example, if the iZi Up FIX headrest hits the vehicle's C-pillar. Please observe the heights shown in the type list. When a vehicle is marked with *, the space for the head might be limited to 1,35 m. standing height for specific models of this vehicle. ISOfix anchorages in the passenger seat (position 1) are normally offered as option, so depending on the model this position can be available or not.

! Notice: DO NOT use on a passenger seat fitted with activated frontal airbag.
