

Aztec Grass

Care Guide

Light

Thrives in partial to full sun. No more than 4 to 6 hours of direct sunlight is recommended.

Water & Humidity

Aztec grass is pretty drought tolerant, but it does need to be watered weekly. Can thrive in dry, humid, and even coastal conditions.

Temperature

Can handle temperatures down to 20°F.

Food

A single application of slow-release fertilizer applied in Spring can be beneficial.

Toxicity

Non-toxic to humans and animals.

Growers Tips

Can be mowed once a year during late winter to remove last season's declining foliage.
