

Eurolite Certified Safe – S2 Series: Model EL12

European Inspired Design

The Eurolite range is a European inspired design to meet the requirements of consumers living in lower risk environments. The S2 models are a lightweight design suitable for apartment, retirement villages, student accommodation, and in some instances upper-level installations in private homes where other methods of Security and Access Control are present.

The Eurolite safe has met the stringent European Security Standard, EN14450: S2, tested and certified by Internationally Approved Laboratories in Europe.

The Eurolite range is built under the Integrated Management System (IMS) Certification, which encompasses the ISO 9001:2000, ISO 14001, and OHSAS : 18001 (Operational Health and Safety Assessment Series) Certifications - thus committing delivery of standard products, under pre-defined quality and safety procedures which are being continually monitored and assessed by Internal & External audits.

Godrej Security, the Eurolite Manufacturer, is also renowned globally for its ethical Business practices and its concern for environmental and social welfare.
