

The EZStudRack System is not just for
exposed studs, visit
www.EZStudRack.com

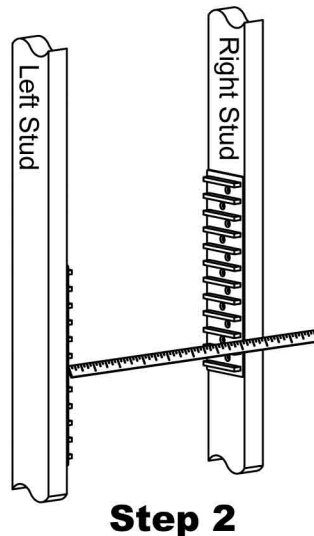

for pantries, drywall garages, playrooms
shoe storage, recess storage, etc.

EZStudRack 5 Minute Installation

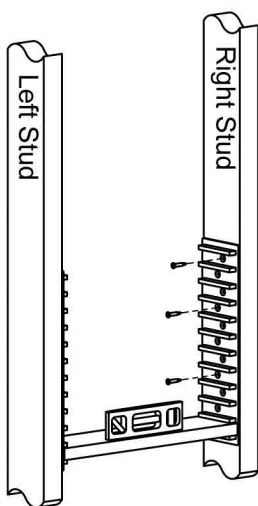

Step 1

1. Attach first EZStudRack with 4 supplied screws.

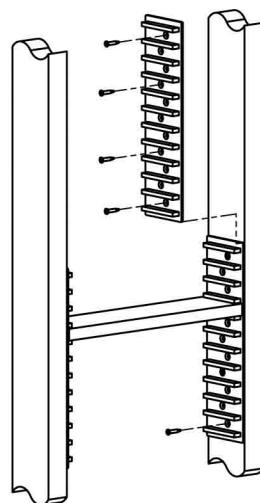

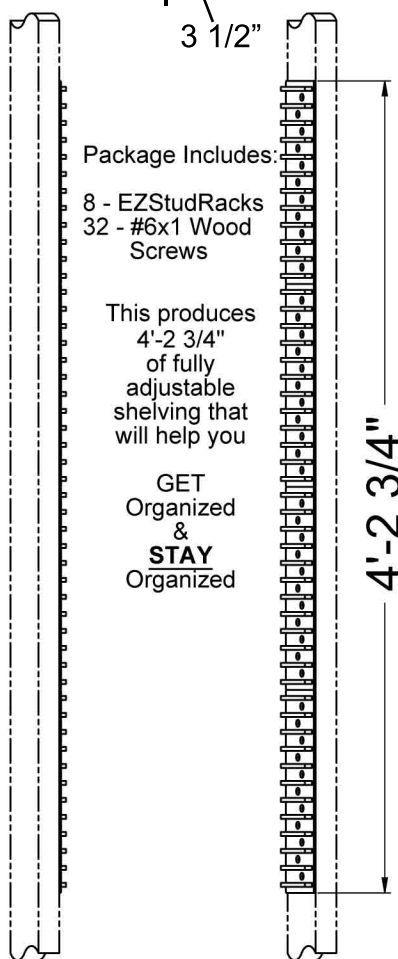

Step 2

2. While holding second EZStudRack in place measure distance.
3. Cut shelf to fit.

Step 3

4. Insert shelf into lower slots.
5. Adjust second EZStudRack until shelf is level.
6. Attach supplied screws.

Step 4

7. Move shelf and attach bottom screw.
8. Position more EZStudRacks and repeat Step 1.

WARNING! 45 LB. LIMIT PER SHELF WHEN USING SHELVES LESS THAN 8 INCHES DEEP.
The ultimate weight limits imposed on the shelf are directly related to the quality of your studs, shelves and the size and number of the mounting screws used (we include four- 1 inch #6 Phillips Flathead screws). The EZStudRack, by design, has been tested to hold over 150 pounds of weight using a 1x6 between studs.
