

Let's find your ring size.

1. Cut the tool along the inner part of the outline and where the dotted line is.
2. Wrap the tool tightly around the finger you will wear your Ratchet Ring on, where the ring will sit, by inserting the arrow-end into the slot where the dotted line is cut. Make sure it's snug enough that it can't move up or down.
3. Note the number the arrow points to. This is your ring size.
4. If the arrow points to a line between two size numbers, choose the smaller of the two. Keep in mind to maintain a snug fit when determining your number.

We do not recommend this method for measuring for a thumb ring due to the enlarged joint on this particular finger. Make sure to account for the joint if your joints are considerably thicker than the rest of the finger.

Measure this line to 5 cm to ensure your form is printed at 100%
