How to shape your CG Hunter Faux Orchid with succulents for a natural and lifelike appearance

Step 1: Unpack and Inspect your Faux Orchid

Carefully remove the faux orchid from its packaging, ensuring it does not damage the petals or stems during the process.

Step 2: Shape and Curve the Stems

While gently supporting the stem where it's attached to the bamboo stake, softly bend and shape the stems into a curve or arch, mirroring the graceful posture of a live orchid.

Step 3: Shape the Leaves

Using your thumb and forefinger, shape and curve the leaves in a downward direction.

Cleaning: Use a soft cloth or microfiber cloth to gently wipe away any dust or particles, keeping the faux orchid looking pristine.
