FCC Warning:
15.19 Labeling requirements.
 This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

15.21 Information to user.
 Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

15.205 Information to the user.
 Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful

Interference to other communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to a different power outlet or different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Radiation Exposure Statement

1. This transmitter must not be located or operated in conjunction with any other antenna or transmission.

2. This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between the radiator and your body.

Q I have a 1994 Ford Taurus with 100,000 miles. The car has been in the shop several times for engine problems. The last time was about a year ago when the engine was replaced. Since then, the car has been running well, but I have noticed that the engine oil level is dropping rapidly. I have checked the oil level regularly and it seems to be dropping about a quart every 1,000 miles. I have also noticed some oil leaks under the car. I have tried to fix the leaks myself, but I am not sure if I have done it correctly. I am wondering if there is anything I can do to prevent the oil from dropping so fast. I have also noticed that the engine seems to be running a bit rough lately. I am not sure if this is related to the oil problem or if it is a separate issue. I am wondering if you can help me with this problem. I have also noticed that the engine seems to be running a bit rough lately. Why does my computer fail to perform well with pulling data after setting a high-pulling rate? High-pulling rate requires parallel compression, and memory-intensive parallel compression may experience lower I/Os. Reduce the parallel coefficient.

關於「如何以國際標準為目標，改善我國的會計制度」，我國會計制度與國際標準會計制度之比較，可分為會計科目、會計處理、會計報告、會計監督等四方面進行比較，如表 1 所示。

spc. Why does my computer say it did not receive the file and pollinate after setting a high-polling rate? High-polling rate requires a valid `OutputFormat` and `MemoryFormat`. Use `HighPollingComponent` only together with `File` or `FileIO` as the `OutputFormat`.
