

## FAUCET CARE

It's easy to overlook the importance of cleaning your faucet, so use this easy tip once a week to prevent mineral deposits from forming and keep your faucets sparkling.

### INSTRUCTIONS

1. Make a mixture using mild soap and water.
2. Using a soft sponge, gently rub the mixture around the entire faucet.
3. Rinse immediately with pure water and dry.

### SUPPLIES NEEDED

For best results, we recommend using Bar Keepers Friend® for sinks, and a mild dish detergent for faucets to protect the finish.

Mild Soap

Soft Sponge

Microfiber Cloth
