Rocky Mountain has been designing and developing mountain bikes in and around North Vancouver, BC since 1981. From our earliest beginnings, our bikes have been designed and tested to withstand the demanding North Shore trails. Our backyard supports our research and development process while giving us access to endless adventures and inspiration.

Between Vancouver's North Shore and Beauce, QC, we have an impressive heritage. We've built a legacy of mountain bike innovation that's core to our brand. As riders ourselves, we obsess over material quality, frame geometry, and suspension kinematics, always looking to improve the products we build, the way we work, and the way we engage our customers. If you ride the legendary trails near our North Vancouver Development Centre, it's not uncommon to run into pro riders like Thomas Vanderham and Jesse Melamed out for a rip with our engineers, testing prototype frames welded in-house in North Vancouver.

The 2020 lineup is a major milestone for Rocky Mountain. We've been working on forging new ground with our Powerplay e-MTB line, a complete redesign of the frame design of our big mountain platform, and thoughtfully designed our hardtails to get riders more comfortable out on the trail.

We're a Canadian company with a global community. Regardless of where you ride it's our goal to make sure that when you're out on the trail riding a Rocky Mountain, you love the ride.

LOVE THE RIDE

Product Trailmap

Our engineering and product teams are hard at work designing Rocky Mountain's next generation of bikes. Please keep in mind this is a development trail map only to help give you a peek at what is to come; product delivery may be adjusted based on testing and parts availability. We appreciate you keeping these platforms and availability windows confidential.

RIDE-9 ADJUSTMENT SYSTEM

The RIDE-9 adjustment system allows riders to quickly fine-tune their geometry and suspension with a pair of Allen keys. Nine configurations are possible thanks to two interlocking chips.

RIDE-4 ADJUSTMENT SYSTEM

The RIDE-4 adjustment system allows riders to quickly fine-tune their geometry with a pair of Allen keys. Four configurations are possible thanks to one rotating chip. This allows for subtle geometry changes with minimal effect on your shock tune.

Smoothwall Carbon FRAME MATERIAL

Smoothwall carbon uses one of the world's most sophisticated carbon processes to deliver industry leading stiffness-to-weight, ride quality, and durability. We eliminate excess resin and fibers by using rigid internal molds instead of traditional air bladders. We then utilize different types of carbon in specific frame areas to maximize stiffness and impact resistance while minimizing overall weight.

FORM Alloy FRAME MATERIAL

FORM tubesets utilize premium materials to meet our strict requirements. Each FORM tube that we create is engineered for its specific purpose within the frame, ensuring optimized strength, weight, and ride quality.

RMB 6061

ALLOY

RMB 6061 custom alloy balances strength, weight, and value. The heart of every bike is its frame, and this tubing allows us to produce a high quality frame in an economical package.

Smoothlink

SUSPENSION

Smoothlink suspension is efficient yet supple when you're on the pedals and across a wide range of gears. It features a controlled end-stroke and a rate-curve that feels more capable than the travel would suggest. This four-bar suspension design philosophy is centred on ride characteristics; each bike platform we develop balances variables like anti-squat, axle path, chain growth, rate curve, anti-rise, etc. to achieve the legendary Rocky Mountain ride feel.

Size Specific

TUNE

Size Specific Tune ensures that riders of all sizes get the right balance of small-bump compliance, mid-stroke support, and end-stroke progressiveness. Our design team does custom shock tunes based on real world field testing, and adjusts each tune for specific frame sizes.

Pipelock

COLLETS

Pipelock collets expand radially and lock into the frame, creating the widest and most rigid pivot stance possible. Using Pipelock collets allows us to lower our front triangle pivot-weights while maximizing lateral stiffness.

Dynam 3.0

DRIVE SYSTEM

Designed in Canada, in collaboration with Propulsion Powercycle, the Dynam 3.0 drive system is a sleek, lightweight, and powerful electric assist that pushes the boundaries of electric bikes. Its compact, low-mounted motor allows us to design electric mountain bikes to our suspension and handling standards—with proper geometry and ideal pivot placement. The system provides class-leading power, instant response, and super-fast charging.

For riders who carve corners, attack technical trail features, and grind out epic climbs, we design bikes for that perfect ride feel. We believe in continuously improving our products and are not afraid to carve our own path and sweat every detail. We want to make sure that you enjoy riding our bikes as much as we do!

Mountain

A mountain biker is shown in a dynamic, low-to-the-ground position on a rocky, moss-covered trail. The rider is wearing a blue helmet, a dark jacket, and a backpack. The bike is blue with "ROCKY MOUNTAIN" written on the frame. The background is a blurred, rugged landscape of dark rocks and sparse vegetation.

ELEMENT

DESIGNED FOR
XC

FRONT TRAVEL
120 MM

REAR TRAVEL
100 MM

WHEEL SIZE
29"

Be in your Element. From stage wins and multi-day rides to the top step of the BC Bike Race; this is the result of over two decades at the front of the pack.

The Element features efficient suspension performance, refined geometry, RIDE-9 adjustability, and room for two bottles inside the front triangle. Now available in both carbon and alloy models, the smallest details were examined in the search of weight savings, point-n-shoot rigidity, and unrivaled speed.

Fast as lightning!

Quick and nimble, the Thunderbolt is total livewire. Whether it's powering up technical climbs or popping off every trail feature in sight, its 27.5" wheels and 140mm of rear travel makes this bike ready and capable for when you're feeling creative with line choice. The frame is available in both carbon and alloy, and our RIDE-9 adjustment system gives you the power to further adjust geometry and ride characteristics to your liking.

Trust your Instinct. Stable and aggressive, the Instinct is our most versatile trail bike.

Whether you're setting out on an all-day epic or pushing the limits of what's possible on your local trails, the Instinct's ride-quality is second to none. Available in both carbon and alloy, the combination of fast rolling 29" wheels, modern trail geometry, and our RIDE-9 adjustment system means the Instinct is ready for anything you throw at it.

INSTINCT CARBON & ALLOY BC EDITION

DESIGNED FOR

Enduro

WHEEL SIZE

29" (27.5+ ready)

FRONT TRAVEL

160 mm

REAR TRAVEL

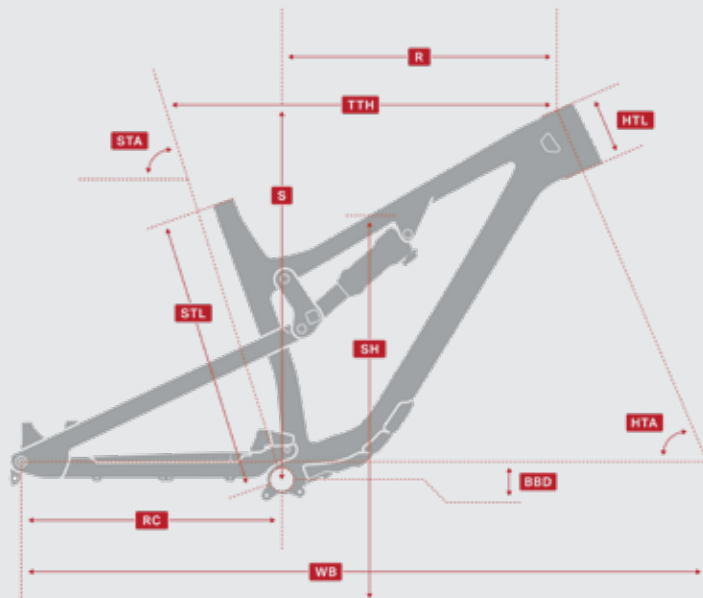

155 mm

Born in BC, we've turned the Instinct into an aggressive trail monster.

Designed with an optimized single-position link, ultra-aggressive geometry, and a long stroke shock that provides 155mm of rear travel, we've kitted out the Instinct BC with wide bars, big tires, ultra-stiff wheels, and more capable suspension. It smashes all mountain lines, rails corners, and plows over everything in sight, while displaying all the climbing efficiency that makes the Instinct a crowd favourite.

NOTES

Taking trail to new heights. Often imitated but never surpassed, the Altitude pushes the envelope of what a modern trail bike is capable of.

The Altitude is our highly capable, fun, do-it-all trail bike. It's the perfect blend of pedaling efficiency, small-bump sensitivity, and has the ability to charge hard! The Altitude is easy to get along with, tackles whatever you throw at it, and helps boost confidence when looking to navigate a technical section of trail. Available in both carbon and alloy models, the frame integrates next-generation features like Fox Live and Shimano Di2 compatibility, while giving the rider the opportunity to tailor the bike to their riding style and terrain using our RIDE-9 adjustment system.

DESIGNED FOR
Big Mountain

FRONT TRAVEL
180 & 170 MM

REAR TRAVEL
180 & 170 MM

WHEEL SIZE
27.5" & 29"

NOTES

NEW FOR 2020!

The ultimate big mountain platform, the Slayer is meant for riding fast and sending it deep. Designed to be able to pedal to the top of any mega descent, this bike allows you to shred corners, hit gaps, and ride harder than you ever thought possible.

Whether you're smashing through the roughest trails imaginable or scrubbing lips in the park, the Slayer is built for those who charge. We've made it longer and slacker, with better small-bump sensitivity and a more progressive end-stroke. For those who like to fine tune their ride before they shred, we kept the RIDE-4 adjustment system to allow for further geometry and ride feel customization. Rocky Mountain led the original freeride movement, and the Slayer continues the legacy.

VERTEX

DESIGNED FOR
XC Race

FRONT TRAVEL
100 MM

WHEEL SIZE
**29" (27.5+
compatible)**

The Vertex embodies speed and confidence, sitting at the top of the food chain as our flagship XC-race hardtail.

Its lightweight frame provides incredible stiffness and rolling speed, while its modern, aggressive geometry inspires confidence everywhere on the race course—even technical corners and descents. Available in a next-generation Smoothwall HBO carbon layup for even lighter weight.

GROWLER

DESIGNED FOR

Trail

FRONT TRAVEL

130 & 140 MM

WHEEL SIZE

29" Wide Trail

NEW FOR 2020!

Like a fresh fill of a West Coast IPA, the Growler packs a punch of confidence with its 29x2.6 tires. Cheers, eh!

Push those pedals, hold the line, and enjoy what feels like infinite traction across rough terrain. The Growler is an incredibly capable hardtail that makes short work out of technical climbs, is ready to rail corners, and smooth out uneven ground.

SOUL

DESIGNED FOR
Sport Trail

FRONT TRAVEL
120 MM

WHEEL SIZE
27.5"

NEW FOR 2020!

Ready for camping trips with the family and the gravel paths of your neighbourhood. If you're going to ride, ride in style.

Take that shortcut through the park, not because it's faster but because it's fun. The Soul comes equipped with front suspension, disc brakes, 1x drivetrain, and knobby tires for a smooth and comfortable ride.

SUZI Q

DESIGNED FOR
Fat XC

WHEEL SIZE
27.5 Fat
(29+ ready)

Go fast, stay fat. The Suzi Q throws a wrench in the narrative of slow, plodding fat bikes.

The Suzi Q's narrow Q-factor is more efficient and comfortable than traditional fat bikes. Compact chainstays and an extended reach make for a stable and balanced ride that still feels agile, perfect for everything from local singletrack loops to fat bike racing.

FRAME TECHNOLOGY

Smoothwall Carbon

BLIZZARD

DESIGNED FOR
Fat Trail

FRONT TRAVEL
120 MM

WHEEL SIZE
**26 Fat & 27.5 Fat
(29+ ready)**

The forecast is calling for cold temperatures, a dump of snow, and all you want to do is ride your bike. Sounds great, let's hit it!

There's no need to put a hold on riding during those long winter months, you just need the right tool for the job. The Blizzard is a proper mountain bike with aggressive trail geometry and massively wide tires, ensuring you're ready to ride no matter what the conditions are.

SOLO

DESIGNED FOR
Adventure

WHEEL SIZE
700c & 650b

Built for the pursuit of adventure, the Solo doesn't stop when the pavement ends.

From your familiar weekly rides to taking a chance off the beaten path, the Solo is a bike for any adventure. With massive tire clearance, the ability to run a full-length dropper post, and a 1x specific frame, it's designed for riding anywhere and everywhere. Start your adventure and make every ride your own.

Whether they're riding to school or are putting their first tracks on dirt, experiencing the thrill of riding a bike is a fundamental and healthy part of growing up. Starting with toddler-friendly run bikes, our youth bike lineup has kids covered for any adventure.

Youth

A young mountain biker is captured in mid-air, performing a wheelie on a dirt trail. The rider is wearing a silver and blue helmet, a black long-sleeved shirt, and black shorts with knee pads. The bike is a full-suspension mountain bike with a teal frame. The background is a blurred forest of evergreen trees, and the ground is a dirt trail with some shadows cast on it.

REAPER

DESIGNED FOR
Youth trail

FRONT TRAVEL
120 & 130 MM

REAR TRAVEL
130 MM

WHEEL SIZE
24, 26, & 27.5"*

The Reaper packs the same aggressive trail performance found in our full suspension bikes like the Altitude and Instinct, but in a smaller package for young rippers. Don't fear the Reaper.

The Reaper can tear up singletrack, smash technical descents, and slay bike park laps all day long. And, because we know that kids grow (and have younger siblings), the Reaper is easily convertible from 24" wheels to 26" wheels and vice versa. We also have the Reaper 27.5 option, to keep your kids shredding longer!

**Reaper 27.5 is 26+ compatible.*

GROWLER JR

DESIGNED FOR
Youth Trail

FRONT TRAVEL
80 & 100 MM

WHEEL SIZE
24+ & 26+

JR 24 NEW FOR 2020!

Not your typical "big wheel", the Growler Jr comes ready with everything you need to hit the trails.

From hucking off curbs, skidding in alleyways, and riding your first sections of singletrack, the Growler Jr is ready to tackle it all. The Growler Jr comes complete with a 1x drivetrain to keep things simple, and 26+ or 24+ tires are there to help smooth out the bumps. Shred it hard and have some fun!

SOUL JR

DESIGNED FOR
Youth Trail

FRONT TRAVEL
63 MM

WHEEL SIZE
20 & 24"

From ripping around the cul-de-sac to exploring the woods, you'll be in total control riding the Soul Jr.

The Soul Jr is ready to tear up the neighbourhood. Whether you're building your first jumps out of plywood, riding to and from the park, or headed out with your friends, the Soul has you covered. Available in two different wheel sizes, both models are spec'd with a 1x drivetrain and mechanical disc brakes to ensure comfort and control.

The Powerplay family, powered by Dyname, consists of three platforms – Altitude Powerplay, Instinct Powerplay, and Growler Powerplay. From 27.5 to 29er. From hardtail to full suspension. Powerplay leads the way with diversity, quality and—most of all—a great ride.

Powerplay

POWERED BY

DYNAME™

What makes Powerplay different

A drive that responds immediately when you start. Intuitive everything. A sublime profile. More power. Tons of torque.

While developing the first-ever Rocky Mountain eMTB, we refused to be held hostage by existing drive designs. We built the drive to fit the bike, not the other way around. For ten years, our engineers dreamed, created, tested and meticulously improved upon Dynamer until they got it right. The Dynamer drive is compact, powerful, and smooth. It facilitates pure, unbridled design freedom, as evidenced by the seamless integration of the RIDE-9 adjustment system.

But where's the battery?

Fully integrated into downtube for lighter weight, increased durability and sweet aesthetics.

Force to the frame

Your pedalling force goes into the front triangle, not the drive. You can use real two-piece Race Face cranks, not eMTB cranks, as a result.

iWoc remote

Compact. Bluetooth-enabled. All the info you need; none you don't.

Customizable app

Escape the tyranny of factory settings. Pick your own levels of power-assist.

Get up and go

Patented torque sensing technology means instant gratification, unlike anything else on the market.

INSTINCT POWER PLAY

DESIGNED FOR
Trail

FRONT TRAVEL
140 MM

REAR TRAVEL
140 MM

WHEEL SIZE
29" (27.5+ ready)

The Instinct Powerplay will take you to the places you never thought possible. When it comes time to head out the door for that all-day ride into the alpine, you'll be riding further and faster than ever before on what is our most versatile eMTB yet.

Taking our Powerplay line up the next level, the Instinct Powerplay integrates our powerful **Dyname 3.0** drive system on a 29" wheeled platform for fast rolling rides and long distances. Featuring the **iWoc TRIO** remote, our **RIDE-9** adjustment system, tweaked suspension kinematics, and great small-bump sensitivity, the Instinct Powerplay is perfect for the big epic rides!

INSTINCT POWERPLAY ALLOY BC EDITION

DESIGNED FOR
Aggressive Trail

WHEEL SIZE
29" (27.5+ ready)

FRONT TRAVEL
160 MM

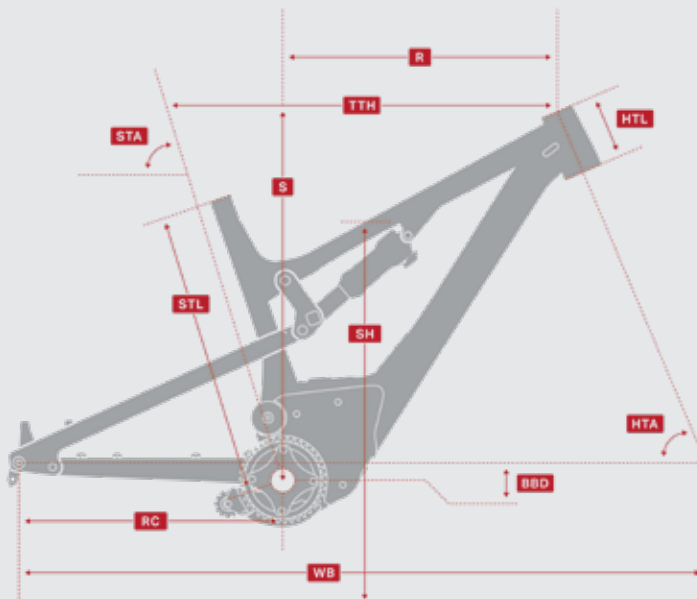

REAR TRAVEL
155 MM

Our Instinct BC edition has proven itself as one of the most capable bikes in our lineup. Now imagine what it can do with the assistance of our Dynamx 3.0 drive system.

Smash down chutes, rail through corners, and then turn it up to "ludicrous" to climb back to the top faster than you ever thought possible. Designed with an optimized single-position link and a long stroke shock that provides 155mm of rear travel, integrated Dynamx 3.0 drive system, and a component spec meant for charging hard, our BC Edition build has everything you want and more.

ALTITUDE POWER PLAY

DESIGNED FOR Aggressive Trail

FRONT TRAVEL
160 MM

REAR TRAVEL
150 MM

WHEEL SIZE
27.5 Wide Trail

NOTES

Ride more, further, faster. The Altitude Powerplay brings cutting-edge power to an aggressive trail bike and opens the door to amazing terrain for all.

This is our fully integrated, electric-assist mountain bike that takes our Altitude's legendary handling and ride quality and adds a compact, powerful drive system. The Dyname 3.0 drive system was designed in parallel with the frame, delivering ultra-short chainstays, optimized suspension kinematics, super-low centre of gravity, and class-leading torque. The result is an eMTB that actually rides like a proper mountain bike—perfect for everything from self-shuttling all mountain trails, finding flow between the descents, and squeezing in power lunch rides.

GROWLER POWER PLAY

DESIGNED FOR
Trail

FRONT TRAVEL
120 MM

WHEEL SIZE
27.5+

The Growler Powerplay will bring your confidence up to speed in a hurry.

By combining high volume 27.5+ tires with the power of our Dynamx 3.0 drive system, this hardtail will have you charging hard on the trails. So, go the extra distance, forget about your struggles with punchy climbs, and celebrate after with a post-ride pint.
