Interior door possible configurations

Valusso Design LLC offer the 8 different configurations of interior doors with single and double options. Any slab can be converted to a barn, a pocket or a bypass door with special hardware (tracks, rollers, hangers, etc.)

Single Swing / Double Swing

Regular swing doors come either as single or double swing doors.

These doors swing opens and closes on two or three (depends on the height) concealed or butterfly hinges. They can be purchased either as a slab, knock-down unit or as a pre-hung unit (available only for single swing).

Double swing doors are pairs of two vertical doors that meet at the middle of the door frame when closed.

Single Pocket / Double Pocket

Pocket doors are available in single and double door styles and ideal for maximizing every inch of space.

A pocket door hides inside of the wall. It simply slides in and out of a space hidden within the wall. Double pocket doors slide together and meet in the middle from both the right and left sides.

Bypass

Bypass doors are sliding interior doors that hang on rollers and run along an overhead track. They are typically mounted in pairs or threes and slide along one axis on a parallel track, passing each other in the process.

Bypass doors do not have any visible gap between them.

Barn

Barn door hangs as a sliding door with barn door hardware. They require adequate space to either the right or left side of a rough opening to ensure that the doors can slide freely back and forth.

The main advantage that sliding doors offer is that they are an incredible space saving solution.

Bi-fold

Bi-fold doors are a set of interior doors attached together by hinges. Slabs slide to open and fold into each other and stacked neatly against a wall. Bi-fold doors typically come in two or four slabs and used for small spaces like closet, pantry, laundry area, and the likes.

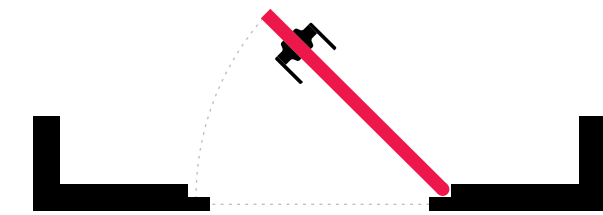

Magic

Magic door has invisible sliding door system that built into the door, making it completely invisible whether the door is in closed or open position.

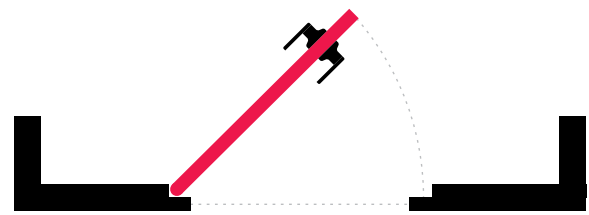

In magic door we use completely concealed hardware and smooth running track.

Installation instruction

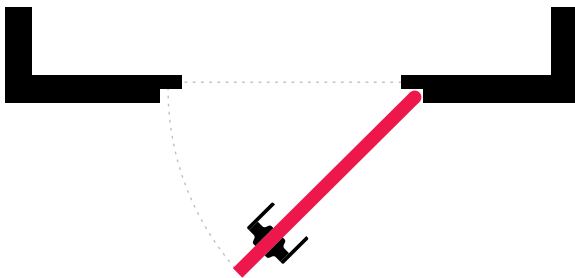

Swing directions

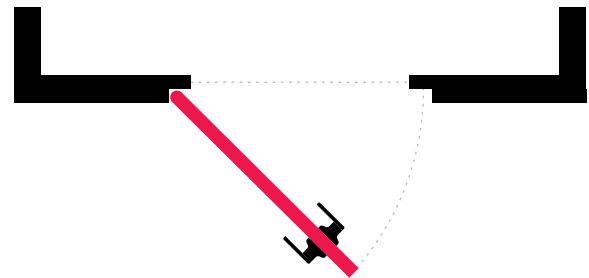

Right (RHI)
Right hand in-swing

Left (LHI)
Left hand in-swing

Right (RHO)
Right hand out-swing

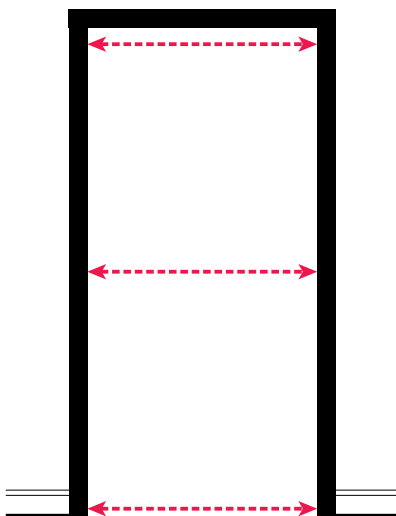

Left (LHO)
Left hand out-swing

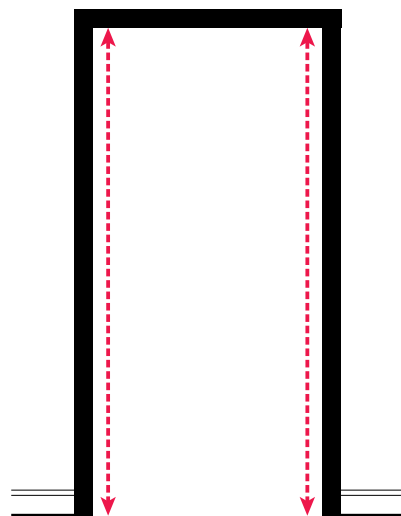

IF YOU ARE REPLACING AN EXISTING INTERIOR DOOR: To determine the door swing direction you should stand outside the room and open the door. Stand in the position when the hinges are behind the back and decide with which hand you should open the door. If you use your right hand to open the door - the swing direction is Right Hand In-swing (RHI), in case you use your left hand to open the door - that would be Left Hand In-swing (LHI). Please keep in mind that Left Hand In-swing (RHI) is the same as Right Hand Out-swing (RHO). And Right Hand In-swing (LHI) is the same as Left Hand Out-swing (LHO).

IF YOU ARE INSTALLING A NEW DOOR AND JAMB IN A ROUGH OPENING: Decide which side of the frame will have the door hinges. Stand in the position when the hinges are behind the back and decide which hand you would use to open the door. If you use your right hand to open the door - the swing direction is Right Hand In-swing (RHI), in case you use your left hand to open the door - that would be Left Hand In-swing (LHI).

Measurement of the rough opening

First, measure the width between the studs of the doorway three times and record the smallest of the three measurements.

Second, measure the height on both sides and record the smallest measurement.

About us

Valusso Design LLC is a group of companies with factories in Europe (Poland, the Ukraine, Belarus) and warehouse in Fort Lauderdale, Florida. We use only modern and hi-end equipment – painting lines from Italy, woodworking machines from Germany and China and produce our products from high-quality materials brought from all over the world. The group of companies produces more than 100.000 door units every year all over the world. We operate 6 production areas with CNC machine, painting line, woodworks at our Fort Lauderdale warehouse. Together with assembling operations we make mortise services at our warehouse in Florida, as well as resize, pre-hung service and final special painting. Our stock has more than 5000 doors.

We are proud to provide quality doors and associated joinery for over 20 years to the most prestigious names in the DIY sector and to builders merchants, Independent door retailers, Interior designers, architects across the USA. As a company we are committed to ensuring that we provide the highest level of service together with quality products at cost effective prices. We are focused on innovation and offer our customers the most comprehensive range of solid wooden doors available in the USA. We remain focused on providing excellent customer service. We do this through our trusted manufacturing, project management and professional sales team.

Why customers choose us

Never out of Stock

5000+ prefinished stock doors are always in the warehouse in Florida, Fort Lauderdale

Ultra-Modern Design
