Dumawall+. A waterproof tongue and groove wall cladding. The Dumawall+ wall tiles are made of completely solid UV-resistant panels and provide an elegant finish to indoor walls. Carefree fitting and low maintenance.

PRODUCT: 911 CHICAGO

E A S Y

Dumawall+ tiles turn tiling into child's play. No hassle with cement adhesives or grinders. The Dumawall+ tiles can be pasted on to the wall or affixed using hidden nails or staples.

OUR TONGUE AND GROOVE SYSTEM ENSURES A FLAWLESS INSTALLATION WITHOUT USING ACCESSORIES

tongue and groove installation

A U T H E N T I C

Once in place, your wall will exude the natural charm of a genuine tiled wall. The authentic DUMAWALL+ micro grout line can be seen and felt, but you will no longer have to deal with dirty or crumbly grouting. You can choose to have the tiling effect in a brick pattern (A) or in a straight lay pattern (B) as shown in the above drawing.

SOLID TONGUE AND GROOVE WALL TILES

Our tiles are made with revolutionary RCB® technology. RCB stands for Rigid Core Board. This unique and patented technology ensures that the boards are extremely stable, water-resistant and safe. The ideal base for tiles that you can enjoy for a long time.

FINISHING PROFILES

Our aluminium profiles provide an elegant finish to your walls. They are anodized which makes the profiles more modern, elegant, hard and wear resistant.

THE DO-IT-YOURSELF TILE

Installing wall tiles could sometimes lead to frustration and inconvenience. Working with cement adhesive is not always easy. We are not all handymen and the whole house will suffer when messing with cement adhesive and grinders. Dumawall+ tiles now ensure, this is a thing of the past.

EASY TO GLUE WITH DUMAFIX

Dumafix is a high-quality, quick hardening adhesive based on an MS polymer. Dumafix is suitable for fixing and installing Dumaplast products in PVC such as wall and ceiling panels and trims on basically any surface (porous and non-porous surfaces).

CAN BE GLUED DIRECTLY TO OLD TILED WALLS.

NAILING

Dumawall+ tiles are unique in that they can also be installed without using adhesive or other liquid fixing materials. You can easily install our tiles using nails or staples by using the nail lip developed for this purpose.

DUMAWALL+ PROPERTIES

STRONG
solid panel

Solid panels that can handle a shock or two.

UV RESISTANT
colour fast

Can resist sunlight but only to be used indoors.

H₂O RESISTANT
100% Water-resistant

Water-resistant material, extremely suitable for wet rooms and low maintenance.

EASY FIX
using nails or adhesive

Easy to install using nails or adhesive: ideal for renovation work.

CLEAN
no more dirty grouting

No dirty or crumbly grouting during or after installation.

EASY CONNECT
tongue and groove installation

Unique tongue and groove system for easy and fast installation.

EASY SIZE
easy to transport

Easy to transport and easy to handle when installing.

HYGIENIC
easy maintenance

Maintenance friendly because of the watertight and dirt-repellent top layer.

EASY COVER
covers old walls

Ideal for renovation work and can also be installed on existing old tiles.

Approved in accordance with the applicable European standards. Dumaplast guarantees superior European technology and a high quality.

Best result with reference to French standards for volatile organic substance emissions.

Guaranteed stability thanks to RCB® technology.

10-year guarantee for stability and significant colour fading..
