

# Titan Canopy Weight Bag Instruction Sheet

Please note that the Titan Canopy Weight Bag can be purchased empty or prefilled. Your canopy weight bag set includes (4) canopy weight bags and (8) plastic bladder bags. Each canopy weight bag has two cylinders with zippers for adding sand.

## Empty –

1. Important! – Insert bladder bag into canopy bag cylinder before filling with sand. Trying to insert a bladder bag filled with sand into the canopy weight bag will result in a torn bag.
2. Important! – After bladder bag has been filled with sand, remove excess air from plastic bag before sealing the zipper. With excess air removed and bag sealed, tuck remaining material into canopy bag and close the outside zipper on the canopy bag.
3. Repeat steps 1 & 2 for the remaining canopy weight bags until filled.

**Important !** – Should you decide to remove sand from the canopy weight bag: Unzip the canopy weight bag as well as the bladder bag. Leave bladder bag inside the canopy weight bag and empty sand. **DO NOT REMOVE BLADDER BAG FILLED WITH SAND FROM THE CANOPY WEIGHT BAG. DOING SO WILL RESULT IN A TORN BLADDER BAG.**

**Prefilled** – Your canopy weight bags came prefilled and are ready for use.

**Important !** – Should you decide to remove sand from the canopy weight bag: Unzip the canopy weight bag as well as the bladder bag. Leave bladder bag inside the canopy weight bag and empty sand. **DO NOT REMOVE BLADDER BAG FILLED WITH SAND FROM THE CANOPY WEIGHT BAG. DOING SO WILL RESULT IN A TORN BLADDER BAG.**

**Directions for Use** – See illustration below.

1. Take prefilled canopy weight bag and wrap both cylinders around leg of canopy.
2. Secure canopy weight bag to canopy leg with attached Velcro strap.
3. If using a ground stake, insert stake through metal ring located at the bottom of the bag.

**\*Note** – Ground stake not included and ground stake not shown in illustration below.
