This vegan-friendly container wax also has a beautiful white texture and unmatched stability, making it popular with our luxury clients.

## WICK

The Wedo LX candle wick series is one of Wedo's simplest and most popular wicks. Suitable for paraffin container candles, votives and pillar candles, the LX wicks are made of cotton and are without cores. All wicks are 110mm long with a thin paraffin wax coating for stability.

## **USAGE RECOMMENDATIONS**

- We recommend heating CS1 to 75°C to melt.
- Add the fragrance at 70°C and stir for 60 seconds.
- Warm your glasses by putting them in a 40°C oven for 5 to 10 minutes.
- The mixture is ready to pour at 65°C into warmed glasses.
- If the top is uneven once set, you can flash the surface with a heat gun or do a top-up pour to get a clean finish.
- Leave the candle to cure for at least 2 days for the best results.

# **DISCLAIMER**

Each report shows test results for a set of candles made by Candle Shack's R&D team for that particular recipe. The test reports are not a guarantee that all candles made to the recipe will burn in exactly the same way. Variables such as ambient temperature, air flow, or the manufacturing process can affect the burning profile of a candle, so it is recommended that candle makers conduct their own testing to ensure that they are satisfied with the performance of their product.
