DRIFT OCH UNDERHÅLL

MAINTENANCE

Tak måste regelbundet rensas från löv, skräp och annat som kan orsaka igensättning av brunnarna. Tidsperioden mellan underhållen an brunnarna kan variera beroende på miljöförhållandena (vind, träd, grus, etc.) Det rekommenderas att underhåll utförs innan regnperioden börjar.
Roofs must be cleaned regularly removing any leaves, debris or anything else that may cause the outlets to block. The interval in witch the outlets must be cleaned should be in accordance with local environmental conditions (wind, trees, season etc). It is also advisable to carry this maintenance out just rainy season.
