

## SOLDNER ELECTRIC WHEELS

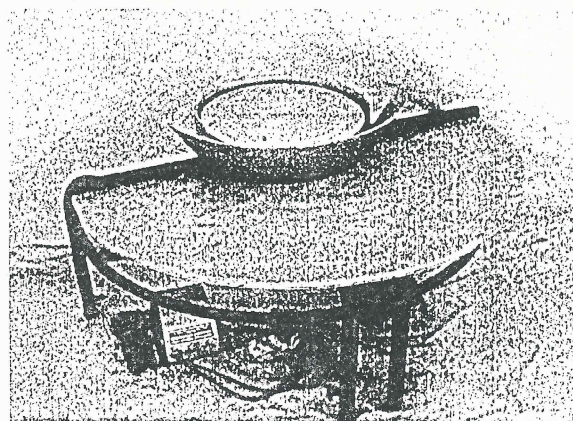

### S-SERIES Studio Potter's Wheels

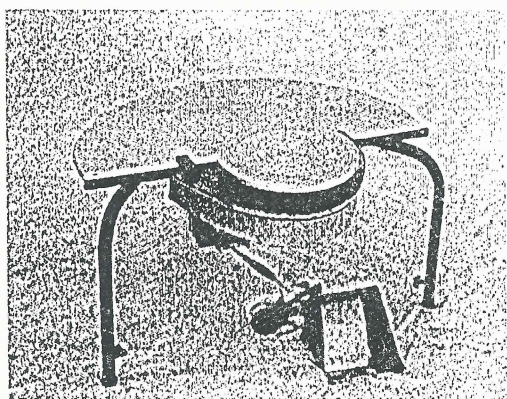

The studio size wheel has a cast aluminum frame work and a 3/4" plywood top finished with polyurethane. Available in two sizes, S50 and S100. The model number indicates centering capacity in pounds, based on using a standard 14" bat. Both have permanent magnet DC motors, 14" aluminum wheel heads, 2-pin bat system (10" centers), sealed ball bearings, and heavy-duty pulley/V-belt drive system. All Soldner wheels come standard with adjustable height and reversible control. Can be used with a Brent splash pan. (sold separately)

### P-SERIES Professional Potter's Wheels

The professional size wheel has a sturdy bent tubular steel frame and 3/4" plywood work surface finished with polyurethane. Available in three sizes, P100, P200, and P400. The model number indicates the centering capacity in pounds; based on using a standard 14" bat. All have permanent magnet motors, 14" aluminum wheel heads, 2-pin bat system (10" centers), relubricable ball bearings, and heavy-duty pulley/V-belt drive system. All Soldner wheels come standard with adjustable height and reversible control. Shown with aluminum half splash pan and trim tray. (sold separately)

### CL-50 (Clamp on) Wheel and PDQ Table

Strong, flexible, and rugged best describe the Soldner CL-50 electric wheel. It is capable of centering up to fifty pounds when mounted to the PDQ Table or other study work surface and when using a standard 14" bat. It has a cast aluminum frame and the same 3/4" top and reversible speed controller as the other Soldner wheels. The PDQ Table is a valuable accessory for the CL-50 when space is a concern. It collapses easily for storage or mobility. The CL-50 can be mounted to tables in order to customize work areas or make this potter's wheel, wheel chair accessible. Can be used with a Brent splash pan. (sold separately)
