

Triangles - A step by step photo tutorial

LET'S KNIT TRIANGLES STEP BY STEP!

1. Cast on your stitches loosely, checking they'll stretch enough.

2. Always slip the first stitch of the row, holding your yarn in front of work, as if you were purling it (so without twist).

3. On the first WS row, knit until you reach the last two stitches. You're going to work your first w&t.

4. While holding yarn to back of work, slip next stitch from left needle to right needle.

5. Bring yarn to front of work, between the stitch you just slipped and the next one.

6. Return the stitch back from right needle to left needle.

7. Turn your work to RS, and knit to end of row (you're now going to knit in the opposite direction).

8. You'll notice a little gap where you "wrapped" the stitch and "turned" to work the RS.

9. On WS, always slip first stitch (point 2) and knit to 3 stitches before the gap.

10. Work another w&t. So while holding yarn to back of work, slip next stitch from left to right needle.

11. Move yarn to front of work, between the stitch you just slipped and the next one.

12. Slip the stitch back from right to left needle.

13. Turn your work to RS, and knit to end of row.

14. Your triangle starts taking shape!

15. Repeat steps 9-13 until 3 sts left before last gap. You'll now clearly see your triangle!

16. Knit one more row, the gaps will close as you knit past them.

17. Take your next color. With old color, hold yarn to front and slip first stitch, bring yarn to back, cut old color.

18. With new color, knit second stitch. Pull slightly the two ends from back.

19. If you're going to weave in ends as you knit, do it starting from there. Knit to end of row.

20. Knit one more row (always slipping the first stitch).

21. Slip 1 (always slip with yarn in front), knit 1 stitch. You'll now start working w&t from this side of your work.

22. While holding yarn to back of work, slip next stitch from left to right needle.

23. Move yarn to front of work, between the stitch you just slipped and the next one.

24. Return the stitch back from right to left needle.

25. Turn your work to WS.

26. Knit to end of row. Again a gap is formed.

27. This time we'll knitting **PAST** the gap.

28. Knit to 1 stitch past the gap, and now work a **W&T** as before.

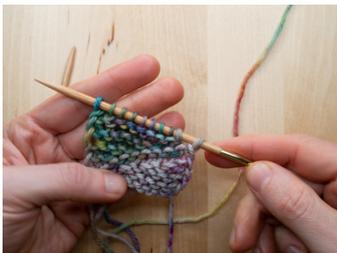

29. Hold yarn to back, slip stitch to right needle, bring yarn to front, return stitch back to left needle.

30. Turn to WS, knit to end.

31. Repeat steps 28-30.

32. Repeat until 1 stitch left past last gap. Your triangle is now forming on the other side!

33. Now shape the second half of the triangle as before, repeating steps 9-13: knit to 3 sts before the last gap.

34. W&T: hold yarn to back, slip stitch to right needle, bring yarn to front, return stitch back to left needle, turn work.

35. Repeat last two steps until 3 sts left before last gap. Another triangle is done.

36. Knit one more row, to close the gaps as you knit past them.

37. Take your next color and knit two more rows.

38. Knit one more row, as you'll always start shaping the triangles on the shorter side of the work.

39. Repeat all of the steps from 21 to 32. You'll work triangles like that until you reach your desired length.

40. When the strip is your desired length, turn your work and bind off.

41. And you're done! Repeat to work as many strips as you desire.
