

MINIMALOSITY

Installation Guide

Welcome to the world of modern lighting solutions! We are thrilled that you have selected our home lighting store, Minimalosity, to cater to your lighting needs. At Minimalosity, we strive to bring you the best lighting options that are durable, high-quality, and visually appealing.

We understand that the installation process can be challenging for some of our customers. Therefore, we have prepared a comprehensive installation guide that offers step-by-step instructions to help make your installation process as easy as possible. The guide covers everything you need to know, from the tools required to safety measures to take.

In case you encounter any issues during the installation process, our customer support team is always here to assist you. Our team is friendly and knowledgeable, and we are available to answer any questions or concerns you may have. Please feel free to contact us at help@minimalosity.com, and we will be happy to assist you in any way we can.

Before you begin the installation process, please ensure that you take the necessary safety precautions. Turn off the electrical power to the fixture at the electrical panel and utilize an appropriate voltage tester to ensure that there is no power present at the fixture. We strongly advise against relying solely on visual inspection to confirm that the power is off. This step is crucial to prevent any accidents and ensure a safe installation process. Keep in mind that hardwire installation does require an experienced electrician.

At Minimalosity, we are confident that our installation guide is easy to follow, and we have included all the information you need to make your installation process a success. However, if you encounter any issues, we are always here to help. Our primary goal is to provide you with an exceptional customer experience, and we are committed to ensuring that you are satisfied with your purchase.

INSTALLATION STEPS

- I. First, determine the load-bearing capacity of the installation location.
- II. Remove the suspension plate in the ceiling plate, turn expansion screws in the ceiling corresponding to the hole spacing of the suspension plate, attach the suspension plate to the ceiling with self-tapping screws, and confirm that the installation is secure (No.1).
- III. Make sure that the power supply is disconnected, then connect the cables, with the live wire connected to L and the neutral wire to N. Pay attention to the wiring to ensure that the wires are in good contact and not exposed (No.2).
- IV. Adjust the length of the suspension wire to the optimal length.
- V. Align the mounting hole of the suction cup with the hanging plate and fix it with the screws previously used on the hanging plate. Make sure that the installation is secure.
- VI. Install the light source on the lamp body.
- VII. Finally, turn on the power to test the light.
- VIII. Installation is now complete.
