For People And The Planet

This year marks the 18th anniversary for World Centric, and a pivotal moment for the company and the world. The planet's ecological systems continue to be extremely stressed due to human activities, and the cycle of poverty is exacerbated even further by the pandemic and economic inequities.

Companies need to make a difference by working to provide for basic necessities like food, water, sanitation, education, healthcare and more. They also need to affect environmental change, especially in communities where resources aren't available to mitigate environmental degradation.

Today we continue to uphold the same mission and values to be of service to people and the planet in all that we do, and elevate awareness of global sustainability issues.

Looking ahead, World Centric is committed to innovating compostable, plant-based materials and packaging to help reduce the environmental impact of the foodservice industry on the planet.

AF AMAZON FRONTLINES

Indigenous-led Rainforest Protection and Cultural Survival in the Amazon

GRANT: \$90,000 | FISCAL YEAR 2021

Indigenous Rights

Indigenous peoples in the Upper Amazon are fighting to protect their right to land, life, and cultural survival.

Amazon Frontlines works hand-in-hand with Indigenous-led groups to create a model of Indigenous resistance and international solidarity rooted in the defense of Indigenous territory, cultural

survival, and the building of viable solutions-based alternatives to rainforest destruction.

This year World Centric is supporting two of Amazon Frontlines partners: Alianza Ceibo and OWAP.

Alianza Ceibo

Located in the Waorani, Kofan, Siona and Siekopai Indigenous territories in the Upper Amazon across Ecuador, Colombia and Peru, Alianza Ceibo has forged a model that builds power with communities in the Upper Amazon by providing the tools, resources and networks people need to thrive in their lands and protect their forests.

In 2022, they plan to scale this model with funding from World Centric, by focusing on three interrelated strategies:

- Carry out hard-hitting advocacy and legal strategies so communities can exercise their rights to decide over the future of their territories
- Combine cutting-edge technology with bottom-up organizing to halt illegal activities through real-time forest monitoring and secure land titles
- Incubate initiatives like intercultural education and food sovereignty, that support long term cultural survival

OWAP (Organización Waorani de Pastaza)

Decades of resource extraction and colonization threaten the wellbeing of Waorani Indigenous communities and their ancestral role as guardians of biodiverse rainforest territory.

OWAP is working to recover sustainable forest practices and build resilient livelihoods to strengthen the communities' autonomy in the face of mounting threats.

In 2021, OWAP launched a pilot initiative to boost food sovereignty across 12 Waorani communities by establishing native food crop gardens and training food sovereignty promoters to educate families about dietary health and traditional cropping practices.

In 2022, OWAP will expand its efforts by building 20 more community gardens and establishing five school gardens to teach Waorani youth about the importance of rescuing local plants and food for community resiliency and cultural identity. Learn more at amazonfrontlines.org.

STAFF GIVING PROJECTS

Oakland Bloom and Native Conservancy

Donation to support refugee, immigrant and low-income chef entrepreneurs

GRANT: \$10,000 | FISCAL YEAR: 2021

Financial Assistance

Founded in 2015, Oakland Bloom provides educational training and hands-on support for aspiring chef entrepreneurs from refugee, immigrant, and low-income communities who seek to start their own food businesses. They envision a food service industry with equitable opportunities for all.

Their flagship program, Open Test Kitchen, is a year-long food business incubator and training program and they also run a worker-led restaurant, bar, and commissary kitchen called Understory. Their rotating menu highlights cuisines of Filipino, Moroccan, and Mexican origins.

Oakland Bloom also supports food entrepreneurs in building or strengthening their food businesses. By

Nikki Garcia of ASÚKAR

Wanda Kruda of Rincón de la Prima

supporting the development of innovative cooperative business models, they seek to alter the exploitative models of the food service industry.

While the food service industry offers many opportunities to immigrant and refugee chefs, it is also frequently a site of worker abuse.

By training chefs and providing operational support on their pathways towards food business ownership, Oakland Bloom is supporting these entrepreneurs in having agency and leadership over their own livelihood and cultural expression.

Oakland Bloom's work is tied to other social and economic justice efforts because the food industry is only one part of a larger system of exploitation.

To learn more, visit oaklandbloom.org.

Each year World Centric provides funds for employees to donate to non-profit organizations. A small group of employees vets the organizations for the team to support, and regional salespeople vet organizations in their local areas. Here are two of the organizations staff supported with 2021 profits.

NATIVE CONSERVANCY

Habitat Restoration, Food Sovereignty & Cultural Revitalization in Alaska

GRANT: \$6,500 | FISCAL YEAR: 2021

Native Conservancy is rooted in ancient memories of deep blue water and a traditional way of life where wild salmon and silver shimmers of herring return every year to their primordial river origins.

Conservation They strive to maintain and secure titles to Native lands in conservation trusts to strengthen their inherent rights of sovereignty, subsistence and spirituality.

Native Conservancy is building community resiliency through regenerative-based economies and food sovereignty into every aspect of their programs. By activating a network of local leaders informed by traditional knowledge, their resilient community solutions can be adapted to any community's needs and priorities as social enterprises.

Engaging young people ensures new generations will continue to cultivate community food growing, processing, food storage, and land conservation for the next generation.

Their work falls into four categories:

Resilient Community Building

Community resiliency is the central thread interwoven throughout all of their activities.

Indigenous Food Sovereignty

Warming brought on by climate change is changing the natural environment in Alaska. By integrating modern science and freezing technology with traditional knowledge, communities can better preserve their cultural foodways.

Landback & Land Conservation

Safeguarding the last remaining wild salmon watersheds is their Eyak-led, visionary conservation effort now poised for victory.

Oceanback & Habitat Restoration

Subsistence-based and fishing cultures will work together to revitalize the ocean habitat for forage fish, wild salmon, herring and small invertebrates, among other species.

To learn more, visit nativeconservancy.org.

NEW FIBER NACHO TRAYS, STADIUM TRAYS AND LINEAR TRAYS

World Centric is proud to bring you these thoughtfully designed new trays to make takeout at sporting events and concerts more sustainable. Made from unbleached plant fiber, these trays are designed to replace polystyrene and plastic trays that create waste and are not recyclable.

Fiber items with -LF suffix or denoted as Leaf are BPI certified compostable

FIBER CLAMSHELLS, CONTAINERS, COMPOST-A-PAK® & BENTO BOX

Bamboo, sugarcane bagasse and wheat straw fibers can be used to make sustainable alternatives to polystyrene and plastic tableware. Some of these materials are considered residue after crop processing and are often burned. World Centric sees these fibers as a valuable resource to make products like plates, take-out containers, bowls, and other compostables.

FIBER FOODSERVICE TRAYS AND MEAT & PRODUCE TRAYS

Our trays are made from unbleached plant fiber with a bio-based lamination where indicated. Using annually renewable agricultural feedstocks is the perfect alternative to petroleum-based trays as they take less energy to produce and are compostable in a commercial composting facility.

NEW NOTREE® RECTANGULAR & TALL CONTAINERS AND FRY CUPS

World Centric's innovative NoTree® paper containers and fry cups are the tree-free, compostable collection with bio-based linings. These paper items provide more sustainable packaging alternatives to operators and, like all of our paper items, contain no added PFAS.

How do World Centric NoTree® products compare to plastic containers?

	World Centric NoTree® Products	Plastic Products
Material	Made of renewable plant fibers from fast-growing bamboo	Made of non-renewable fossil fuels such as petroleum oil and natural gas
Planet Health	Made of plants that absorb carbon while growing	Plastics manufacturing negatively affects air quality, public health, and the climate
End of Life	Commercially compostable (where available), even with food residue	Plastic recycling is unlikely especially with food residue

PLA CUPS, LIDS, SALAD BOWLS AND CLEAR CONTAINERS

PLA (polylactic acid) products are made from plant sugars which are turned into lactic acid through fermentation, then converted into a polymer. Manufacturing PLA produces 75% fewer greenhouse gases and uses 50% less non-renewable energy compared to conventional plastics made from petroleum.

CUSTOM PRINTING INFORMATION AND DETAILS

Stand out from your competitors and make a stand for sustainability by imprinting your logo on compostable paper cups, bowls, containers, straws, sleeves and select fiber items. Please contact your sales representative or email insidesales@worldcentric.com for product availability, pricing, MOQ's and lead times, which vary by item.

Custom Printing Process

CUSTOM DESIGN STUDIO

Brand Expressions

Create recognizable brand expressions that stand out

We collaborate with you to design leading edge solutions that meet your specific needs and reduce environmental impact. We do this by merging plant based materials with exceptional product design, engineering and manufacturing processes from the beginning, to the end of your product's life.

 **Research, Discovery & Concepting**
World Centric designs and manufactures a variety of custom products for the Consumer Packaged Goods industry. Our team of designers and product developers will work with you to develop sustainable and ownable packaging solutions.

 **Design, Prototyping, & Testing**
The development of approvable physical samples is a key step in our process. We work with a variety of materials, processes, and high quality factories to realize your ideas quickly.

 **Manufacturing & Logistics Management**
Our operations team can quickly bring your designs into production and delivered around the world. As a certified B Corp and member of the 1% For the Planet network, we follow our principles across our entire supply chain, logistics, and quality programs.

We have worked with nationwide brands to create sustainable and iconic packaging. Partnering with creative and operational teams, we help realize their brand vision; from conceptualizing and visualization to prototyping and manufacturing.

Case Studies

A young, nationwide salad and healthy bowl brand was looking to reduce waste and introduce sustainable materials into their growing business.

Working closely with their creative team, our compostable materials enabled the creation of new shapes and forms, not possible with traditional manufacturing processes. These iconic forms have delighted customers and established a strong social media presence.

A California based fresh noodle take-out chain needed help improving their existing product to be more sustainable, compostable, and usable.

Our custom lid solution combined with an easy to hold bowl shape, provided a simple and elegant way to ease preparation, maintain freshness and resulted in a truly enjoyable quick noodle experience.

CONSUMER PRODUCT GOODS

Iconic Sustainability

We can help you create sustainable and ownable brand expressions that set your product apart.

Our team of designers and product developers can work with you to develop unique CPG solutions.

Big Hearted Roast

Cambio Coffee Roasters provides small-batch roasted coffees in an easy-peel eco-friendly pod. We provided Design for Manufacturing (DFM) services for their team to ensure the design could be easily produced while providing secure lid fit, stacking, and separation features.

Health & Beauty

Our eco-friendly and highly moldable materials can protect and display a wide variety of product types and shapes. Our custom designed inserts and secondary packaging help reinforce the sustainable attributes of your product. Images are concepts only.

Wine Packaging

Headquartered in Sonoma County, World Centric is uniquely situated next to some of the world's greatest vineyards. Our expertise in molded fiber provides an ideal packaging solution for glass and other beverage products.

Retail Packaging

We offer customized solutions for retail and online channels. Iconic and sustainable forms are designed around your products to help stand out in your social media streams.

LANEY & LU
MADE WITH REAL FRUITS

World Centric Customer + Composter Success Story

Our society has an urgent need for more widespread commercial composting facilities to keep food waste out of landfills, where it does harm to the environment by releasing methane, one of the most potent greenhouse gases. Across North America, many restaurants are discovering small-scale community composters that are stepping up to help local residents and foodservice operators reduce their waste.

LANEY & LU + Mr. Fox Composting in New Hampshire

Founder Jennifer Desrosiers of Laney & Lu

In Exeter, New Hampshire, local cafe LANEY & LU serves up fair trade coffee, organic teas, smoothies, hearty bowls, salads, soups, sandwiches and much more.

Founder Jennifer Desrosiers believes that food can serve a far greater purpose than to simply fill our stomachs. The 'right' food nourishes our souls, builds community, and connects us with the earth. LANEY & LU can make a meaningful and sustainable difference, and supporting them can too.

"We began LANEY & LU with a strong vision for inspiring community and believe that we have a responsibility to make a positive contribution in the world. This is reflected in how we want our guests to feel seen and important," explains Jennifer.

Supporting LANEY & LU also supports a network of over two dozen local farmers and merchants throughout New England

"We mindfully source everything from our food to our supplies to our packaging. World Centric is an obvious choice for LANEY & LU. Their company values are in alignment with ours and the quality of their products bolsters our customer's experience with our food. The food looks amazing and the packaging feels great in your hand. And, it 100% meet our sustainability ethos."

Supporting LANEY & LU also supports a network of over two dozen local farmers and merchants throughout New England, as LANEY & LU sources local food that positively impacts the community's ecosystems rather than harm them.

LANEY & LU is as close to zero-waste as they come - all of their packaging is compostable and gets picked up by Mr Fox Composting, a local community hauler. Mr. Fox started over ten years ago with the goal of providing composting service along the New Hampshire and Maine seacoast. According to their website, "we believe that the future of our planet is dependent on our communities changing small habits. Composting our organic waste is an easy way to make a difference in the waste stream."

Each week, LANEY & LU fills about twelve large green bins with food scraps and compostable packaging, and

Photo courtesy of Mr. Fox Composting

Composting our organic waste is an easy way to make a difference in the waste stream - Mr. Fox Composting

with the help of Mr. Fox, these items are broken down into compost, some of which is brought back to the Lu Gardens to nourish the soil. Each spring they use this soil to plant vegetables and herbs that go back into their bowls - creating a truly, full circle process.

For more information, check out laneyandlu.com and mrfoxcomposting.com.

If you have a story to share about using and composting our products, email marketing@worldcentric.com.

Our Mission: To be of service to people and the planet

We envision a thriving world where everyone's basic needs are met with a beneficial impact on the environment.

The Importance of Compostables

More than 26 million tons of plastic are sent to U.S. landfills each year. Products made from plants, not petroleum, conserve resources and support cleaner production methods while protecting the health of our planet and diverting waste from the landfill.

We are one of the few companies in the U.S. to sell only plant-based, compostable products while striving to be a model of sustainability and generosity. Since 2009, we have given at least 25% of our net profits annually to grassroots social and environmental organizations as well as offered discounts to schools and non-profits.

In 2010 we became a Certified B Corporation, and in 2013 converted our legal structure to a California Benefit Corporation, demonstrating our continued commitment to make a positive impact on society and the environment.

Our Promise

Our products are designed for performance, strength and aesthetic. Our claims are third party verified and we regularly audit outsourced factories under Fair Labor Organization guidelines to ensure fair wages and working conditions.

Partners

We're passionate about collaborating with businesses and organizations to pioneer innovative approaches to environmental challenges. By partnering with our customers, we hope to inspire others to shift their behavior around consumption and waste.

Our social and environmental responsibility efforts

25% OF PROFITS

Devoting 25% of Profits

To grassroots social and environmental organizations and to account for our carbon emissions from raw material to delivery.

CARBON GIVING

Reduce Carbon Footprint

We work to reduce emissions throughout the entire lifecycle of our products and use renewable energy to power our office.

COMPOSTABLE

Designed to Compost

All of our products are designed to be compostable in a commercial compost facility.

ZERO WASTE

Reduce Waste

We strive to minimize waste at our office by reducing our consumption and diverting waste to compost and recycling.

World Centric is a Certified B Corp.

As a Certified B Corporation, World Centric joins over 3,000 companies and individuals committed to a higher standard of transparency, accountability, and performance in the workplace.

Certified B Corporations are a new kind of business that balance purpose and profit. They are legally required to consider the impact of their decisions on their workers, customers, suppliers, community, and the environment.

This is a community of leaders, driving a global movement of people using business as a force for good.

Being part of the B Corp community means we harness the power of business to solve social and economic problems. Each recertification is a rigorous evaluation process determining that we have met comprehensive performance standards for our workers, community, governance and environment.

B Corps are accelerating a global culture shift to redefine success in business and build a more inclusive and sustainable economy. Some other notable B Corps include Patagonia, Ben & Jerry's, Eileen Fisher and Allbirds shoe company. Learn more at bcorporation.net.

Integrity

Memberships and partnerships

1% for the Planet is a global network of businesses that donate 1% of annual sales directly to approved environmental and sustainability nonprofit organizations.

Post Landfill Action Network (PLAN) is a global movement of college and university student leaders who help launch programs to fight the cycle of campus waste.

RUBICON

Rubicon Global creates software to find cost savings across waste streams and develops innovative ways to reduce, reuse and recycle materials.

The National Minority Supplier Development Council advances business opportunities for Asian, Black, Hispanic and Native American suppliers in the corporate supply chain.

Green America businesses are committed to using business as a platform for social change by embedding social responsibility into the DNA of their company.

The California Green Business Network works with businesses to create a vibrant green economy that helps make communities healthier and more livable.

The US Composting Council advances compost manufacturing, compost utilization, and organics recycling to benefit their members, society, and the environment.

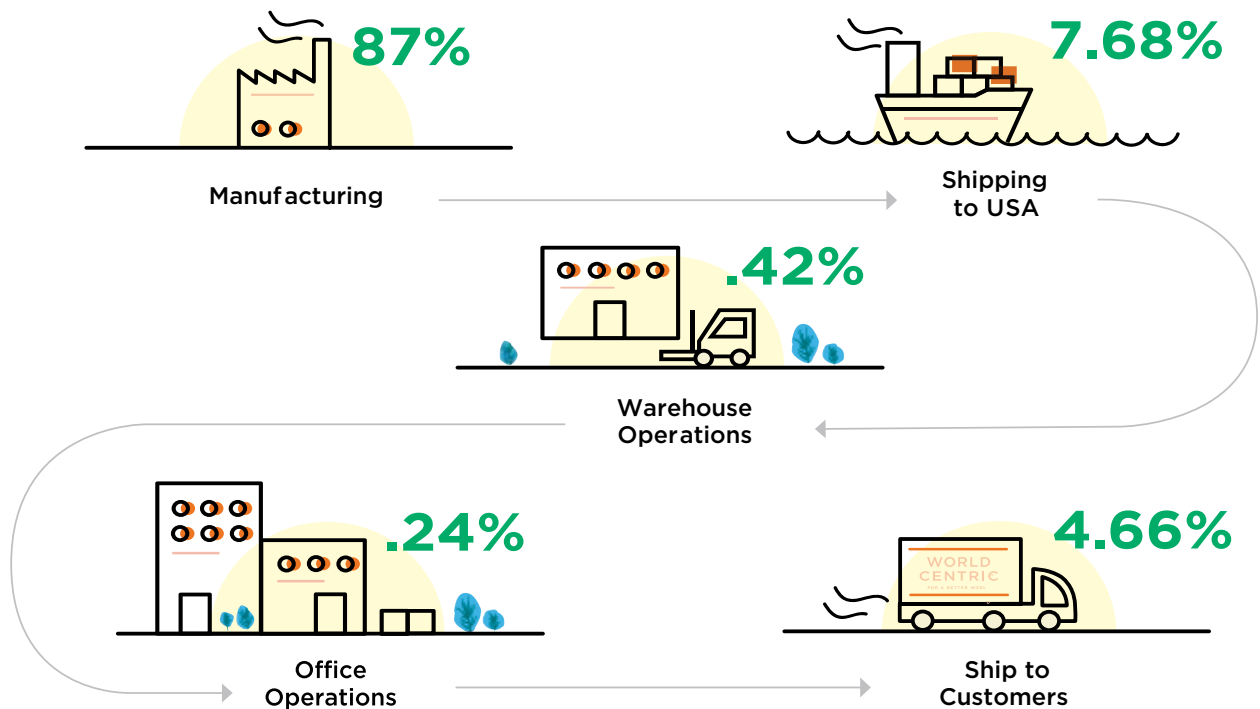

The Sustainable Packaging Coalition brings together businesses, educational institutions, and government agencies to collectively strengthen and advance the business case for more sustainable packaging.

Taking the right steps towards a zero carbon world

\$585,829
2021 Carbon Giving

Our Emissions

We assess and account for our carbon emissions created in the process of making our compostable goods and running our sustainable business, from the production of raw materials and manufacturing, all the way to the transportation to your front door.

Our Efforts

Each year, based on our carbon footprint, we allocate funds to support organizations with long-term solutions to reduce and sequester carbon, which in turn improves the resilience of many of the communities most affected by climate change.

Our Impact

World Centric® upholds rigorous social and environmental responsibility standards and donates 25% of net profits to organizations addressing social and environmental issues, with more than \$1.5 million allocated for donations in 2022.

Take the first step towards sustainability

Climate change is one of the biggest challenges facing humanity. Every action we take as a business has a consequence, so we have taken steps to lower the carbon emissions that come from our manufacturing.

World Centric compostable foodservice packaging is plant-based and designed to break down in a commercial

composting facility so it can be added to the soil. We are committed to product innovation that's better for the planet and work to reduce our carbon emissions throughout the entire lifecycle of our products.

We have the sustainability services to give you more tools to help your business make the switch to compostables.

Our team can help you identify the haulers, composters and other services in your area to increase waste diversion. We can also help you advocate for new services as well as develop user education, posters and signage to communicate proper waste disposal to customers, students and staff.

For more information, contact your sales representative or email zerowaste@worldcentric.com.

Our third party verifications and testing

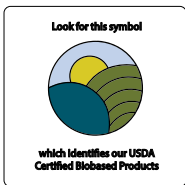

We take our efforts to create a better world seriously. We test our products using the American Society for Testing and Materials (ASTM) standards to ensure they break down in commercial composting facilities. We obtain our tree fiber from certified responsibly harvested forests. Additionally, we test for allergens and quality.

Biodegradable Products Institute (BPI)
BPI is a third-party organization that reviews and certifies commercially compostable products that meet ASTM standards for compostability. To learn more about BPI, please visit bpiworld.com.

TÜV AUSTRIA
TUV Austria is a third-party organization that reviews and certifies compostable products. Our TÜV certifications include OK Compost Home for our PLA bags. For more information, visit tuv-at.be.

USDA BioPreferred Products
The USDA Biobased Product label indicates that a product has been independently certified to meet USDA BioPreferred program standards for biobased content. Biobased products are composed either partly or entirely of renewable plant materials. Visit biopreferred.gov to learn more.

Forest Stewardship Council® (FSC®)
FSC® certification is a market-based tool that supports responsible forest management worldwide. FSC certified forest products are verified from the forest of origin through the supply chain. The FSC label ensures that the forest products used are from responsibly harvested and verified sources. Visit fsc.org for more information.

Compost Manufacturing Alliance (CMA)
CMA is a third-party organization that utilizes a nationwide partnership of compost manufacturing facilities to provide field disintegration testing for food service products.

Gluten Testing
Our fiber plates have been tested by Anresco Laboratories, an independent facility for the measurement of cereal gluten at low levels, nominally within a range of 5-80 PPM, both in our raw materials and finished food products. Analytical Results: Wheat Straw Plates: <5 ppm

World Centric also conducts fair labor audits, food safety audits and product testing. For a complete list, visit worldcentric.com/reports or contact your sales representative.

World Centric Product Patent Information

World Centric® innovations and patents are a key part of what make our packaging sustainable. The following list of our products may not be all inclusive, and other World Centric® products not listed here may be protected by one or more patents.

7" Party Plate with Wine Glass Holder
SKU: PL-SC-7WN
U.S. Patent No. D770,855

9" Party Plate with Cup Holder
SKU: PL-SC-9CUP
U.S. Patent No. D770,854

13.5x6.5x1.25" Flat Bread/Pizza Box
SKU: PB-SC-U13
U.S. Patent No. D735,573

PizzaRound® Clamshell and Two-Part Pizzaround
SKUs: PR-SC-12, PR-SC-14
U.S. Patent No. D843,207, D843,207

24-64 oz COMPOST-A-PAK®
SKUs: FP-SC-1, FP-SC-2, FP-SC-U3
U.S. Patent No. D742,225, D776,528, D708,941, D776,528

Molded Fiber Burrito Bowl Clamshell
SKU: TO-FB-BB
Patents Pending: US, China, EU, UK

120 oz Adjustable Catering Pan
SKU: CA-SC-120V
U.S. Patent No. D759,479

7-10" Square Plates
SKUs: SQ-SC-7, SQ-SC-9, SQ-SC-10
U.S. Patent No. D760,031

Molded Fiber Clamshell Container
SKU: TO-FB-32
Patents Pending: US, China, EU, UK

Molded Fiber 4-Can Carrier
SKU: RG-FB-4
U.S. Patent No. D937,100
Patents Pending: China, EU

Clamshell Containers: The teardrop shaped protuberances on the exterior of the clamshell containers are a trademark of World Centric.®

Molded Fiber Lids with PLA Window
SKUs: CTL-SC-3W, BOL-SC-UBBW, BOL-SC-UBBSW, BOL-SC-36W, BRL-FB-32W
Patents Pending: US, China, EU, UK

TPLA Cutlery: The teardrop-shaped opening in the handle of our cutlery is a trademark of World Centric.®

Molded Fiber Scoop Design
U.S. Patent No. D956,490
Patents Pending: China, UK, EU

Molded Fiber Cutlery (serving spoon and handle) SKU: SS-FB-10-LF
U.S. Patent No. D931,690; Patents Pending: China, EU, UK

Molded Fiber (table spoon)
SKU: SP-FB-6-LF
U.S. Patent No. D931,690; Patents Pending: China, EU, UK

Molded Fiber Cutlery (spork)
SKU: RK-FB-6-LF
U.S. Patent No. D931,690; Patents Pending: China, EU, UK

Molded Fiber Cutlery (serving fork and handle) SKU: SF-FB-10-LF
U.S. Patent No. D931,690
Patents Pending: China, EU, UK

Molded Fiber (ice cream spoon) | SKU: SP-FB-3-LF
U.S. Patent No. D931,691
Patents Pending: China, EU, UK

Molded Fiber (table fork)
SKU: FO-FB-6-LF
U.S. Patent No. D962,725; D932,850
Patents Pending: China, EU

Molded Fiber (table knife)
SKU: KN-FB-6-LF
U.S. Patent No. D932,848
Patents Pending: China, EU, UK

Product benefits and specifications for use

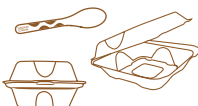

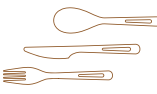

Sustainable Materials

Our paper containers and molded fiber products are made from annually renewable plants such as bamboo, sugarcane bagasse and wheat straw, which also sequester carbon while growing. Paper cups, straws and bowls are made from sustainably sourced paper from FSC® certified sources.

Waste Reduction

When commercially composted, our foodservice ware diverts organic waste from the landfill. Composting also keeps waste disposal local and creates jobs in the local economy. Composting is a great way to reduce greenhouse gas emissions and improve soil health.

The information below is meant to be a general guide and testing is recommended in your establishment.

Hot Items 	Product	Heat Resistance	Freezer Safe?	Time to Compost*
	Plant Fiber Containers and Cutlery	Suitable for foods up to 450° F; Oven and microwave safe for short periods. Testing recommended	Yes	2-3 months
	White Paper Hot Cups/Bowls	Suitable for food and drinks up to 220° F; Not microwavable	Short Term Only	2-3 months
	NoTree® Paper Hot Cups/Bowls	Suitable for food and drinks up to 220° F; Not microwavable	Short Term Only	2-3 months
	NoTree® Paper Food Containers	Suitable for food up to 220° F; Heat lamp and warming oven safe	Short Term Only	2-3 months
	TPLA Cutlery	Suitable for foods up to 200° F; Dishwasher safe	Yes	2-4 months

Cold Items 	Product	Heat Resistance	Freezer Safe?	Time to Compost*
	NoTree® Paper Cold Cups	Suitable for cold and warm food and drinks only	Yes	2-3 months
	PLA Cups and Containers	Suitable for cold food and drinks only	Short Term Only	2-4 months
	PLA Ice Cream Spoons	Suitable for foods up to 120° F	Yes	2-4 months
	Green Bags	Suitable for cold items only	No	2-3 months

*Composting estimates are based on a commercial composting facility. Facilities may not exist in your area.

OUR PRODUCTS ARE RESPONSIBLE FROM START TO FINISH

Molded Fiber Containers & Cutlery

- Made from unbleached bamboo, sugarcane and wheat straw plant fibers
- Bio-lining (where indicated) made from plants
- Gluten free
- Conform to FDA guidelines for food use

PLA and TPLA Cutlery

- PLA Cutlery made from plant sugars
- TPLA Cutlery has talc added for heat resistance
- Conform to FDA guidelines for food use

Paper Cups, Bowls and Containers

- NoTree® cups, bowls and containers made from sustainably sourced bamboo paper
- White cups and bowls made from FSC® certified paper from responsibly managed forests
- Bio-based linings
- Conform to FDA guidelines for food use
- Not microwavable

Cold Cups, Deli Containers & Lids

- Made from PLA, derived from plants
- Conform to FDA guidelines for food use

Food Scraps and Yard Waste Bags

- Made from synthetic and starch-based plastics
- Certified OK Compost Home by TÜV AUSTRIA

*Commercial composting facilities may not be available in your area. Please check with local officials.
