Wireless Credit Card System Installation Instructions
PART NUMBER AC1067-SUW-KIT

Your kit should include the following parts:

1. 1 Modem Processing Unit Part Number AC7777-MODEM
2. 1 SMA External Stub Antenna Part Number AC7777-STBANT
3. 1 External Credit Card Reader/Display Unit with Harnesses Part Number AC7777-CCRDR
4. 1 Translator Board with Harnesses Part Number AC7777-ND
5. 1 Super-U Board with Wireless Software Part Number AC1067-SUB
6. 1 Retro-board with Wireless Software Part Number AC7021
7. 1 Template for Credit Card Reader/Display Unit

Step 1:
Remove the main logic board that is installed in your machine.

Step 2:
Remove the Coin Hopper(s) from the machine.

Step 3:
Drill a hole in the top of the machine to mount the antenna using a 5/8th inch steel hole saw.

Step 4:
Use the template to drill the 5 holes required to mount the Credit Card Reader/Display Unit using a 3/16th inch steel drill bit for the 4 mounting holes and a 5/8th inch steel hole saw for the wire harness opening. See picture for mounting location of unit. Center the unit above the left bill validator.

Step 5:
Mount the Credit Card Reader/Display Unit and the antenna to the machine using the hardware included.

Step 6:
Install the new logic board assembly where the old board was removed. The board assembly will have the Retro-board, the Translator board, the modem processing unit and the Super-U board all mounted on one bracket.

Step 7:
Connect the wire harnesses according to the accompanying picture.
