Consciousness

the new hip

A 2006 United Nations report found that the meat/leather industry produces more greenhouse gases than all the SUVs, cars,trucks,planes and ships in the world combined.

"If a group of beings from another planet were to land on earth- beings who considered themselves as superior to you, as you feel to be to other animals-would you concede them the rights over you that you assume over other animals?"

-George Bernard Shaw, Playwright, Nobel Prize 1925

" I have no doubt that it is the destiny of the human race in it's gradual development to leave off the eating of animals, as surely the savage tribes have left off eating each other when they came into contact with the more civilized."

-Henry David Thoreau, Walden, 1854

the philosophy of olsenhaus is anchored in the universal truth, respect for all beings, with a dedication to the expression of truth in the material world. we are committed to being 100% animal /cruelty-free, producing functional goods with a high standard of ethical and social responsibility.

we continually seek innovative methods, materials and safer processes. we welcome accountability.

elizabeth olsen founded olsenhaus to illustrate plundering, cruelty and greed is not synonymous with true style and consciousness, while further exposing the atrocities being committed on animals, the environment and mankind.
