Spring 2012

*Everything is connected,  
when one being suffers, we all suffer*

We all live on this one planet,  
mankind, the animal and plant kingdoms,  
Are we co-existing in peace, mind, spirit & body harmony?  
Or is there war, suffering, disease, destruction of our habitat, & mental confusion?  
This is not our natural state, and it is not sustainable.

## *Vegan:*

One that does not consume or wear anything from an animal.

The reasons are many either for health, the animals, environmental, or religion.

When combined with elimination of the ego and mental balance one can achieve awareness, remember the true self, higher states of consciousness, and work towards a world of peace and health for all beings, raising the level of the collective consciousness.

## *Facts:*

From start to finish, the amount of energy required to create a leather hide is 20 times greater than the production of a synthetic material. To prevent biodegrading, animal hides are treated with over 225 toxic chemicals some of which are lead, cyanide, formaldehyde, benzene and carcinogenic tannins. These chemical create massive pollution to land, water, air supply and are occupational hazards to workers and those in surrounding areas. Exposure to these chemicals are linked to asthma, lung, stomach, bladder, kidney, nasal, and pancreatic cancers, musculoskeletal disorders and leukemia, to name a few.
