DAVID VS. GOLIATH

Backcountry Bowhunting will help the underdog, the David, the public land blue collar hunter come out on top in the epic battle that takes place in the West's rugged backcountry. A monster bull elk, a trophy high country buck or giant caribou from the wild North country plays the role of Goliath quite well for most of us. And, author Cameron R. Hanes was no different than anyone else. He came up humping his tail through rugged country deep in the wilderness where successes were rare.

Eventually, Cameron developed a system that had him killing trophy animals on a regular basis away from the crowds. And now, Cameron's secrets are shared with all of you in his bowhunting guide book, *Backcountry Bowhunting, A Guide to the Wild Side*. In his book no stone is left unturned. He has

covered challenges no other hunting book has with a complete chapter on Fear. Anyone who hunts deep in the wilderness solo, knows how real fear can be even to the most experienced. Fear of what you ask? Bears, solitude, getting lost. Cameron covers it all. He also touches on another common hurdle for the big country hunter, homesickness. Cameron has been there and shares the best way he's found to overcome these very real challenges. There is much more, gear and equipment is covered in detail

as is specific hunting strategies. If you are ready to take on the backcountry against all odds, this book is for you. You will live the epic story, David vs. Goliath, and this version will end with you

lashing your tag to the antlers of a hard earned trophy. Success will have never felt so sweet. Cameron proves over and over in *Backcountry Bowhunting*, the harder you work, the greater the reward. The question is, are you ready for the next level? If so, *Backcountry Bowhunting* will take you there.
