LET'S GET STARTED

STEP 1

- ☐ Place your candle bowls on a flat surface like a table or counter.

STEP 2

- ☐ Pour the candle sand into each bowl. Get creative with your design! You can make an all-white, all-black candle or try layering stripes, swirls, or diagonal lines using a spoon or funnel. Remember to leave about one centimeter of space at the top.

STEP 3

- ☐ Cut the long wick into small pieces (about 3cm long). Place one piece in the centre of each bowl. Gently press it into the sand so it stands upright. If it leans, adjust the sand to help it stay in place.

TIPS & TRICKS

Use a spoon or small funnel to keep your designs neat and tidy. There's no wrong way to do it. every candle is one-of-a-kind, just like you! If your wick leans or falls over, gently adjust the sand around it to help it stand up straight.
When your candle burns out, simply remove the old wick and add a new wick to enjoy you candle again!
Never leave a burning candle unattended. Keep it away from anything flammable, and always out of reach of children and pets.
