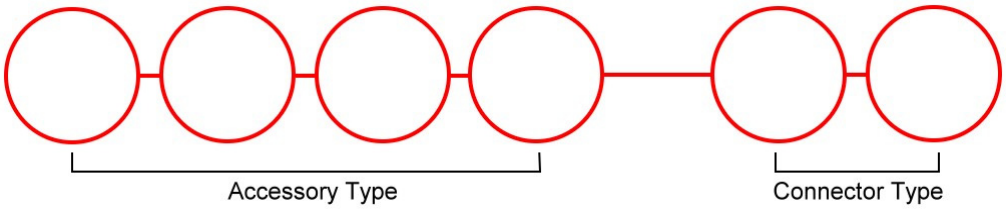
Connector Chart

How our part numbers and connector code chart work together...

We offer products for many different makes & models of radio. For this reason our part numbers are broken up into two main components… the Accessory Part Number + the Connector Suffix. When put together the two components make up the entire product part number for ordering purposes.

Example:

1. Choose the accessory type: X15A (acoustic tube with in-line PTT/Microphone)
2. Choose the connector type: M7 (Motorola XPR connector)
3. Product Code for a X15A to fit the Motorola XPR would be... X15A-M7



Price Codes: Not all connectors are the same price. For this reason we have given all connectors a code to help categorize the costs within our catalogue and price list. Here is a quick summary:

TYPE 1: Standard single and 2 pin style plugs
TYPE 2: Most standard Multi-pin style plugs
TYPE 3: Higher priced Multi-pin and Mobile radio plugs
TYPE 4: Listen-Only style plugs
