Product Description

1.5 wire Surveillance Kits consist of a single wire that leads from the radio connector into the bottom of the in-line PTT/MIC to transmit audio. The second wire leads from the bottom of the PTT/MIC to the speaker/earphone for receive audio. CanCom kits are made of only the best quality components to ensure client satisfaction.

Product Features

- Acoustic tube style speaker is very discreet and delivers crisp clear sound quality.
- Quick change acoustic tube assembly for hygiene and multiple users.
- Wide range of ear tip options including COMTIP noise attenuating tips and ear mold kits for full ambient sound capability.
- Lead wire from PTT/Mic to the speaker has curly section for better head movement.
- Clothing clip rotates full 360° to meet users preferred microphone placement.
- Kevlar reinforced cables for added strength.
- Field replaceable transducers & air tubes.
