

PRIVATE LABEL PROGRAM LMR BATTERIES

If marketing batteries with your company's logo and contact information is important for your business, CanCom can provide you with a complete private label battery program. The labels are professionally designed in-house and printed in rich color on high gloss label stock. In addition to a logo, labels may include your telephone number, web site address, or other desired information. Almost any two-way radio battery we offer can be private labelled. No minimum order is needed for this service.
