

SURVEILLANCE KIT - TWO WIRE (X2 SERIES)

X2A VERSION FEATURES OUR
ACOUSTIC TUBE STYLE SPEAKER

Models: X2A-XX

Product Description

Two-wire Surveillance Kits consist of two wires that lead from the radio connector. One wire has the speaker/earphone for receive audio, while the second wire has the PTT/MIC for transmit audio. CanCom kits are made of only the best quality components to ensure client satisfaction.

Product Features

- Acoustic tube style speaker is very discreet and delivers crisp clear sound quality.
- Quick change acoustic tube assembly for hygiene and multiple users.
- Wide range of ear tip options including COMTIP noise attenuating tips and ear mold kits for full ambient sound capability.
- Soft rubber covered clip to protect clothes. Clip rotates full 360° to meet users needs.
- Kevlar reinforced cables for added strength.
- Field replaceable transducers & air tubes.
