

XBC Bone Conduction Earpieces

Our XBC bone conduction earpieces offer a discreet, effective 2-way communication solution. Incorporating bone conduction technology, this earpiece offers both radio transmit and receive in one simple, comfortable earpiece. High quality radio receive audio. Monitor radio traffic discreetly. Vibration conducting microphone for outstanding in-ear voice pick-up. No need to yell, both regular and whisper voice levels will transmit perfectly.

- Ergonomically designed to fit comfortably
- Speaking through ear-bone vibration
- Ear-hook for additional stabilization
- Anti-noise and wind interference
- Excellent anti-noise (to 95 dB) with little wind interference
- Excellent sound clarity and performance
- Curly cord section for unlimited head movement
- Tactical style PTT with jack for remote PTT option
