

## Pro Series Two-way Headsets

Pro-Series Dual Muff Two-way headsets from CanCom protect your hearing and provide you with clear receive and transmit audio in high noise environments. Built to strict specifications using only the highest quality components. Four models of headset are available to meet your application. Connect to your radio via direct plug-in cable (PTT is done via the ear cup push-to-talk) or In-line Big Button Push-to-talk interface cable. Cables are available to connect to all makes and models of two-way radio.

**Part#: HS11**

Hard-hat-mount  
Model

### Product Features

- Industrial strength headset construction.
- EasyLink™ detachable cords offers ultimate flexibility. Hardwired cable optional (special order)
- Certified CSA Noise Reduction Rating of 24 NRR—Class A.
- Volume Control located on the ear cup for easy access at all times.
- Over sized ear seals for ultimate comfort. Optional GEL ear seals are available.
- Powerful Neodymium speakers produce high quality audio.
- Rugged cables with durable polyurethane insulation.
- Spiral shielding reduces RF interference.
- Heavy Duty Velcro Head strap on BTH model. Rugged band construction on OTH model.
- Industry standard hardhat mount system allows for easy clip on of face shields, etc.

**PNR™ Technology**

#### PATENTED PNR™ TECHNOLOGY

Patented PNR™ technology provides the highest level of audio performance, incredible voice clarity and higher noise attenuation. Certified 24 dB NRR, you can hear the difference! Ultra-lite Neodymium speakers provide rich, smooth frequency response so you no longer have to strain to hear radio conversation.

## Cable & Connector Options

### EasyLink™ DESIGN

EasyLink™ detachable cords allow the headset to interface with virtually all major brands of radio through a built-in universal 5-pin jack and a detachable cord with positive-lock connector. If the cord is ever damaged, simply replace the cord, not the headset, and get back to work in seconds.

Detachable cords, outfitting one person or an entire company is cost effective and provides flexibility for maintenance, expansion, or modifications.

**XHPTT-XX**  
In-line Big Button Push-to-talk adapter. Connect via TA5 jack in the headset. Available for virtually all makes & models of two-way radio

**CB-XX**  
Headset cable, direct to radio. Connect via TA5 jack in the headset. Available for virtually all makes & models of two-way radio.
