made to create

BERNINA

Slide speed control
up to 1,000 stitches per minute

Direct-selection buttons:

- Start/stop button
- Raise and lower the presser foot
- Automatic thread cutter
- Reverse sewing

The **BERNINA Hook with 9 mm stitch width** allows you to sew precise stitches at faster speeds yet quieter than ever before. The extra-large bobbin can hold up to 70 percent more thread than standard bobbins so you can sew with fewer interruptions.

6 Things You'll Love about the BERNINA 7 Series:

Extended Freearm for Big Projects

The BERNINA 7 Series boasts a meticulously engineered extended freearm with 10 inches of working space to the right of the needle. Not only does the B 740 provide plenty of room for large sewing projects; with its 9 mm stitch width, it's also ideally suited for beautiful decorative stitching. Small sewing jobs such as inserting zippers are completed flawlessly. And as your ambitions grow, the B 740 can be further upgraded with a wealth of optional accessories. For instance, add the BERNINA Stitch Regulator (BSR), which guarantees consistent stitches when free-motion sewing and quilting no matter how quickly you move the fabric.

Total Stitch Control

All BERNINA 7 Series models provide an exclusive level of stitch control. Whether altering the stitch length, stitch width or needle position, the machine will remember the stitch details for you. Your personal settings can be saved and retrieved at will—and the USB connection even allows you to import and export stitches and stitch patterns or combinations.

BERNINA Adaptive Thread Tension

The BERNINA Adaptive Thread Tension, a BERNINA innovation, provides ideal thread tension while sewing to achieve perfect stitch quality on both sides of the fabric. Once the tension is set according to the thread and fabric used, BERNINA Adaptive Thread Tension will constantly check the thread tension, adjusting it automatically if needed. The result is the finest stitching without pressing a button.

BERNINA Dual Feed

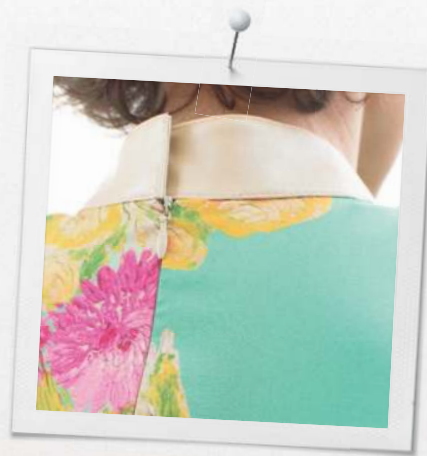

The innovative BERNINA Dual Feed tames hard-to-manage fabrics providing superb fabric feed and optimum visibility while sewing. Easy to engage when needed, the BERNINA Dual Feed tucks completely out of the way when it's not.

Sew with More Ease

The B 740 performs many tasks all by itself. The presser foot lowers automatically at the beginning of a seam. Threading is semi-automatic, and the thread is automatically cut when you reach the end of a seam. The standard package also features a practical extension table that makes working on all your sewing projects an absolute breeze.

Tips and Tricks

User-friendly features and intuitive navigation: the Sewing Consultant and built-in tutorials offer direct onscreen support and instant answers to your questions.

BERNINA Quality

For decades, BERNINA has been passionately committed to the development of sewing and embroidery machines. Swiss precision is at the heart of our products, and high-quality materials guarantee a long product life and high performance.

The BERNINA 740 offers a wealth of functions and features that make sewing easier. Inventions such as the semi-automatic threading system and the BERNINA Stitch Regulator (BSR) testify to the BERNINA spirit of innovation. The BERNINA 7 Series will also wow you visually with its simple yet exclusive design—because we concentrate not only on sophisticated technologies, but also on setting new standards in product design.

SWISS ENGINEERING

The BERNINA Hook

With the launch of the 7 Series, BERNINA introduced an absolute world's first, the BERNINA Hook, which uniquely combines the advantages of the two best hook technologies. This latest BERNINA innovation is patented.

The heart of the BERNINA 7 Series features a novel, centrally placed driver, which allows the BERNINA Hook to run fast yet quietly. The BERNINA Hook sews high-precision stitches up to 9 mm in width with speeds up to 1,000 stitches per minute. The bobbin holds up to 70% more thread than standard bobbins allowing you to sew longer without interruption.

Finally, the BERNINA Hook is made of high-quality materials that allow the thread to run smoothly at consistent tension.

BERNINA—made to create.

"Working with a BERNINA has an inspirational effect on my designs."

Mathias Ackermann, Swiss Designer

Creating his first designs when he was still a child, Mathias Ackermann realized from an early age that he wanted to make his passion his career. As a tailor and fashion designer, he still sews all his designs himself. Since 1997, Ackermann has worked in his own couture studio in Büren an der Aare in Switzerland. The first shirt collection of his "Little Kingdom" label was presented in February 2006 in Zurich at Globus, an upscale department store with an exclusive range. In the same year, he was nominated for the Swiss Fashion Award. BERNINA is delighted to be able to work with this talented Swiss textile artist.

"I love working with the BERNINA 740, and not just because of its well-engineered technology. Features such as the threader and the BERNINA Stitch Regulator thrill me to bits. What's more, its versatility inspires me with new ideas, and its user-friendliness is simply brilliant. It also sews the finest fabrics, effortlessly."
