

# next-gen cleaners

**Issued in the public interest  
for safe & sure clean by yourself &  
a general information  
on how to remove hard & salt water stains easily.**

DOT Home Care products are called as Next Gen cleaners as they are different from the products available in the market. India's **one and only** specialty chemical manufacturer making more than 10 specialty cleaners. Out of 15 household cleaners, 5 products are unique products in India.

Every product formulation has been tested at the customer's place where salt water and water hardness are heavy.

Every precaution has been taken care of, for manufacturing the specialty chemicals. All our products contain only 1st-grade chemicals, so if you are unable to remove them, please ask for free advice through the customer care number in the package as **there is no other product in the market available powerful than DOT.**

Many buyers buy the product but are unable to remove the stains, hence we came up with this Do IT Yourself awareness guide.

All our videos are available on YouTube by searching DOT Home Care and they are real & UNCUT videos.

FRIENDS, NEIGHBOURS, RELATIVES.**

## BATHROOM TILES CLEANER - DESCALER

To remove salt, hard water stains anywhere and on floor tiles, wall tiles, plastic buckets, toilet bowls, ceramic wares

India's 1st Industrial descaler launched to retail customers.

**Key features** of descaler is : no smell and no fumes. Fumes are dangerous to the stainless steel items in the bathroom and to humans. Our principle is to not sell direct acids to our buyers.

If you are unable to remove the stains using this liquid, then you cannot remove it using any other liquid as it is very powerful than any liquid in the market.

- This is a powerful liquid which is an Industrial chemical launched to retail customers.
- This is a very highly powerful descaler than any available in the market.
- Apply the descaler using a handle scrubber and scrub it.

### How to remove stains:-

- **Light stains:** Just apply the liquid and scrub it. Don't even need to put pressure while scrubbing. It will be easily removed.
- **Strong stains:** Leave it for 5 minutes and scrub it.
- Strong stains are in the corner of the floor or the place where the water stagnates, where the water is leaked, Use Salt/emery Paper between No 80 and 120 Available in the hardware shops.
- Apply the liquid and scrub it using salt paper. It will remove very easily.
- **Strong layered stains:** Apply the liquid and leave it for 5 minutes. Use a scraper, chisel or blunt knife and scrap it. It will be removed easily.
- **Coloured tiles:** Pink, Red, Blue, Black, Vitrified tiles, ceramic, Italian marble, Granites, and natural stones.

Apply the liquid, scrub it immediately, and wash it immediately. Do 1 tile at a time. White Patches will be formed if any chemical is used on these tiles. Never put any acid content cleaners and give wait time.

**Tile Joints & Grouts:** Only Descaler with acid content is the product available in the market that is safe for joints and grouts. Avoid using direct acids or cleaners that contain HCL acid.

**Anti Skid Tiles:** Even if the stains are fewer but it will be tough as the stains will be inside the pores (anti-skid area) in the tiles. Try to clean yourself, otherwise, do have cleaners do it as it will be very heavy task to remove it. However, if the stains are very less and the pores/holes are big, you can use descaler to remove it.

WATCH 2 BATHROOM CLEANING VIDEOS AND THAT HELPED A LOT OF CUSTOMERS

**Notes:** [WWW.YOUTUBE.COM/DOTHOME CARE](http://WWW.YOUTUBE.COM/DOTHOME CARE)

- ✓ **DO NOT use on stainless steel items. Even if used, the liquid should touch only the stains and not the SS item.**
- ✓ **Never put liquid and give wait time.**
- ✓ **Use handle scrubber**
- ✓ **Never use it on Italian Marbles. We have a special liquid for Italian Marbles, & Granites.**

### ARREST SALT STAINS IN FUTURE

Once all the stains are removed and bathroom looks like nice, **STOP** using D1 and start using our DOT Floor Cleaner 2.2 or Marbles Cleaner 2.3 - Mop the house and finally mop the bathroom as it will arrest and protect from salt stains in the future.

# TAP AND SHOWER, MULTIPURPOSE CLEANER

To remove salt, hard water stains anywhere and on tap, shower fittings, SS sink, white patches around SS Sink, Kitchen Surface, Wash Basin Surface and light stains on Bathroom floor, Mirrors, plastic buckets, toilet bowls, ceramic wares

India's 1st **non-acidic**, and cost-effective cleaner and safest cleaner for **branded and elite** taps and shower fittings.

The **Key features** of the tap and shower is non-acidic. Acids with a point 5 percent causes serious damages to the stainless steel items in the bathroom

## UNDERSTAND STAINS

This happened due to your existing cleaners. Tap and shower cleaner that contains acid is the main cause for the silver coating to be removed.

Elite Fittings - DO not use scrubbers as it causes scratches - Non-scratch scrubbers are the right choice.

Buy DOT Tap & Shower Cleaner - Powerful Plant-based and Safe on all Branded & Elite tap and shower fittings.

No one can deny and many of them don't accept it, but this has happened due to the usage of acid content products on taps and shower fittings.

Never use any cleaner that even has a POINT 5 percent acid content.

This type of tap fittings cannot retain its original state.

The acid fumes cause rust formation If any acid content is used in the bathroom cleaning process, Not just this tap but you can notice rust formation on all stainless steel items placed inside the bathroom.

Buy DOT Stainless Steel Cleaner (Rust Remover) to remove these stains before the rust goes deep inside them.

### How to use:

Just spray and scrub. That's all.

White patches around the sink, spray and scrub with little pressure and wash it. if its strong, then buy DOT Floor Polish to remove white patches around the Sink and Wash Basin area.

### Notes:

- **DO NOT** any cleaner that contains even point 5 percent acid.
- **Never use branded toilet cleaner to remove stains on taps and shower fittings.**
- **Use non-scratch scrubber**
- **For Elite fittings Use ONLY a sponge to scrub.**

There are many cleaners that claim shining. However, shining is not needed actually because the fittings are already with shine & do not go away. We just need to remove the salt and hard water stains.

**Check the 1-star comments before purchasing any cleaners.** If you find about removal of chrome plates, silver coatings, rust formation, or bulges on fittings, avoid purchasing it.

# FLOOR CLEANER, MARBLES CLEANER

use on any kind of floorings,  
Tiles, Marbles, Granites, Italian Marbles, Natural &  
Readymade tiles, stones, Cement & Mosaic Floors, all Home appliances,  
Cupboards, Fridge door, Cabinets, Sticker marks, Crayons on walls, Cylinder marks.

India's 1st floor cleaners that contains activShiner composition and concentrated cleaner and works as a Kitchen Degreaser.

- ✓ More Anion content to protect
- ✓ Neutral colour
- ✓ All types of floor
- ✓ Gives & Restores the lost shine
- ✓ Removes heavy oil stains
- ✓ Removes hard water stains
- ✓ Long Lasting & Divine floor

If bathroom is clean, you can mop the floor with this liquid which arrests salt formation. No need to buy Bathroom Cleaner & Floor cleaner

India's 1st non-acidic floor cleaner with oil stain remover composition along with activShiner. No floor cleaner can give shining to the flooring.

### How to use:

**Oil stains:** Apply the liquid on the stains and wait for min. 2 to 5 minutes and scrub it using the appropriate scrubber.

**Floor Mop:** Take 25 to 50 ml for half bucket water and mop the floor. Finally mop the bathroom floorings as it helps to arrest salt formation and soap scum.

**Anti-Skid Tiles:** First use DOT Bathroom Cleaner D1, and apply the liquid. The light stains will get removed. Later apply the Floor Cleaner liquid D2 on the stains evenly and leave it for 5 to 10 minutes. Scrub using the scrubber. Continue this process till the salt stains are removed.

**Note:** If the salt stains are formed very heavy, the above process is will be tough for you to remove. If the anti-skid tiles have very small holes, then please have cleaning companies to clean it.

# SHOWER GLASS CLEANER

to remove salt and hard water stains from shower glass cubicle cleaner

**India's 1st Shower Glass cleaner & only manufacturer**

**How to use:** Just spray the liquid and scrub it using a **clock and anti-clockwise directions**.

**FIRST TIME USERS:** Spray the liquid on the stain, scrub it clockwise and anticlockwise movement using a non-scratch scrubber or a hard scrubber for heavy stains with **little pressure** for the first time and wash the glass with water. **MAKE SURE THE WHITE PATCH is removed.** Wipe with tissue paper if needed. • **Do not wipe using cloth.**

Note: - Stop using unknown cleaners which creates FOG after cleaning as it spoils the glass.

**Use a non-scratch scrubber to avoid scratches.**

Note: This is purely non-acidic.

Acidic cleaners will remove the salt stains quickly, but it will leave FOG formation once dried, hence never use any ACID or SLES content cleaners

## Read before choosing right product

### India's 1st Shower Glass Manufacturer

**How to use:** Wet the appliance, Take few drops and rub it. You can use bare hands as it does not contain acid or any harsh chemicals. Rinse it with water.

## Important Note:

- ✓ No chemical in the world can remove stains as soon as it is poured. You will have to scrub it. Make it 2 to 3 washes at regular intervals. On a general note, never expect an immediate result and go on with 2 to 3 washes.
- ✓ Never apply acid content chemicals on Stainless steel/ Taps & Shower fittings.
- ✓ Never use direct ACIDS in bathrooms as it is very dangerous to the health of adults. The smoke causes damage to the stainless steel items fitted in the bathroom.
- ✓ Buy chemicals that do not spoil tile grouts/joints
- ✓ Read instructions before using our products.

# LIMESCALE DESCALER

## DECALCIFIER

DOT Descaler is specially formulated descaler with non-hazardous indirect & equivalent HCL acid to remove limescale stains in washing machines and all stainless steel items and household appliances

## Application:

Washing Machines: All kinds of Top and Front load Washing machines.

Dishwasher appliances if there are limescale stains. use DOT Kitchen Oil Stain Remover.

## Directions:

**Washing Machine:** Ensure washing machine is empty.

Front Load: Washing machine, take half packet of the powder in the main wash chamber of DD tray.

Top Load: Drop **entire pack** of powder in the wash tub after taking in water and filter. Run the washing machine on normal

After cycle is finished, use a towel to wipe any left over residue from the washer drum.

Run the machine with water again for minimum 15 minutes and drain it.

For washing the clothes on the same day, use the machine after 30 minutes.

**Shower Head Holes:** Detach or remove shower head or sprinkle nozzle.

Take **Half Packet** powder in hot water (use drinking water) in a plastic mug and mix the solution using plastic or wooden spoon.

Cover the shower head/nozzle with solution for a few minutes.

Rinse with plain water. Unclog the nozzle with tooth picks if needed..

If the stains are heavy, use DOT Bathroom cleaner D1 or D1.1, however read instruction before use.

**Unable to detach/remove:** Fill plastic bag with the mixed liquid. Put the bag over shower head, Fasten with a rubber band. Soak it for 15 minutes. Unclog the nozzle with tooth picks if needed.

*finally...*
